

IoT Connectivity for your company

Effortlessly manage your global IoT infrastructure with our Managed IoT Connectivity solution. From standard SIMs to rugged eSIMs and seamless coverage in 180+ countries with 400+ roaming partners. Monitor costs, create reports, and stay ahead with flexible, future-ready connectivity on a centralized platform.

MANAGE. MONITOR. REPORT.

01.

Keep in control

Streamline your IoT SIM cards with our easy-to-use platform.

02.

Manage lifecycles

Orchestrate the SIM lifecycle with your product lifecycle.

03.

Pay-as-you-go

With pay-as-you-go you only pay for SIM cards when activated.

ONE PLATFORM, MANY FEATURES

Reporting

Create reports in a few clicks and know everything about current usage and status of your SIMs and eSIMs in an instant.

Connectivity on demand

Activate or deactivate connectivity on demand. From data, to text and voice, any option is possible.

Session Control

See if your SIM cards are working as expected and easily manage or troubleshoot if not.

Troubleshooting

In case of issues or failures react quickly. Set alerts for events that may cause connectivity interruptions, like theft, malfunction, or connectivity loss.

Why IoT Connectivity by A1 Digital?

Flexible Network Options: Choose from 2G, 3G, 4G, 5G, NB-IoT, LTE-M, voice, and SMS to keep your devices connected.

Custom Tariffs: Tailored plans based on your actual use. Choose from Data, Voice, SMS bundles or Pay-per-use.

IoT SIMs and eSIM Profiles: From Industrial IoT SIM to eSIM, we have the right rugged M2M SIM card designed to withstand extreme conditions.

SIM Lifecycle Management: Assign different SIM stages (Test, Sleep, Live Status) throughout the product life cycle for tailored applications.

Centralized control: Control all your assets from a single platform, no matter where they are in the world.

Worldwide coverage: Global roaming in over 180+ countries with a single robust SIM card.

24/7 Support: Our M2M team is here for you, offering expert assistance in both German and English for any project challenge.

Smart Alarms: Set individual alerts for events that cause interruption or high costs. Ensure you never overpay but use the network efficiently.
