

Company Introduction

Kunming Seeshine Optoelectronic Technology Co, Ltd. was established in January 2021, specializing in the design, production, installation, and testing of eyepiece modules for various night vision machines and near-eye display applications.

The company operates a state-of-the-art clean workshop spanning 1400 square meters and has obtained ISO9001 quality management system certification. Equipped with an automated eyepiece assembly and inspection system, we ensure the reliability, consistency, and efficient supply of our products.

Our technical team possesses extensive knowledge of micro displays detectors from leading global brands.

With rich project experience in eyepiece design, micro display application, optical adaptation and display effect optimization among others, we have developed a range of eyepiece module products to cater to diverse specifications of displays and detectors.

Additionally, in deep collaboration with several partners, we are capable of providing customer-tailored eyepiece modules along with customized detector movement solutions and infrared machines to meet specific requirements.
