

# GILLSEN: A Professional Hearing Protection Manufacturer with 18+ Years of Expertise

GILLSEN, a professional manufacturer rooted in Ningbo, China, specializes exclusively in the production of hearing protection products, standing out as a reliable and experienced player in the global market. With a steadfast focus on quality and innovation, the company has carved a solid reputation in two core application sectors: shooting, hunting and tactical fields, as well as the labor protection industry, delivering tailored noise protection solutions that meet the rigorous demands of each scenario.

Boasting over 18 years of rich production experience in the hearing protection sector, GILLSEN has accumulated profound expertise in product design, manufacturing craftsmanship, and quality control. This long-standing industry presence enables the company to fully understand the unique needs of different fields — from the need for reliable impulse noise protection in shooting and hunting scenarios (which requires shielding users from harmful loud noises while preserving ambient sound awareness) to the demand for durable, comfortable hearing protection for workers in various labor environments. Over the years, GILLSEN has been committed to refining its production processes, adopting advanced manufacturing technologies and strict quality inspection standards to ensure that every product delivered to customers is safe, reliable and durable.

At the core of GILLSEN's technological strength is its Chief Engineer, Jason Tao, a highly respected figure in China's hearing protection industry. As one of the earliest engineers to engage in this industry in China, Mr. Tao has witnessed and participated in the development and upgrading of the domestic hearing protection sector. With his profound professional knowledge and forward-looking vision, he has been actively promoting the research and development (R&D) and technological advancement of electronic hearing protection products, breaking through technical bottlenecks and driving innovation in product performance and functionality. His dedication and contributions have not only enhanced GILLSEN's core competitiveness but also advanced the overall development of China's electronic hearing protection industry, earning him widespread recognition and prestige among peers.

In addition to its strong R&D capabilities and mature production experience, GILLSEN also provides professional ODM/OEM customization services to cater to the diverse needs of global customers. Whether it is customizing product designs, adjusting specifications, or adding brand elements, the company has a professional team to provide one-stop customization solutions, from concept ideation to mass production, ensuring that the final products fully meet the specific requirements of each client. This flexible customization capability has helped GILLSEN establish long-term and stable cooperative relationships with customers in various countries and regions, expanding its global market influence.

Rooted in Ningbo, radiating globally, GILLSEN has always adhered to the principle of "quality first, innovation-driven, customer-oriented". With its 18+ years of industry accumulation, the professional leadership of Chief Engineer Jason Tao, and its reliable ODM/OEM customization services, the company continues to provide high-quality hearing protection products for the shooting, hunting, tactical and labor protection industries, striving to become a trusted global partner in the hearing protection field.
