

TACTICAL BREACHING

For a remarkable span of over 15 years, SAN has been at the forefront of transforming tactical breaching capability on a global scale.

In operational use across more than 40 countries, SAN influence resonates through revolutionary breaching gear, advanced training courses, and disruptive reusable training aids.

SAN provides a world-leading electro-hydraulic breaching system forged from lightweight materials that redefines speed, precision, and mobility. With a single operator in mind, SAN system empowers access to any structure in record time, with an arsenal of capabilities that sets a new standard for breaching capability.

Today, SAN is proud to be the prime supplier to the IDF (Israel defense forces) and earning the trust of police and firefighter units worldwide. SAN's breaching tools are in operational use by special forces spanning North and Latin America, Europe, Asia, Australia, and Africa.

SAN's breaching capability was created **FOR Breachers BY Breachers**, based on broad operational experience. Hence SAN's offers a groundbreaking capability for the Police & HLS units, Firefighters & Rescue teams, Military & Special Forces in terms of Multi-functional, Weight, Design, and Speed.

Beyond its preeminent product offerings, SAN is equally committed to comprehensive training solutions. Acknowledging the diversity of operational scenarios, SAN offers a suite of training courses and reusable training aids to build the unit's breaching capabilities. These resources, meticulously devised by SAN, empower tactical operators to be prepared for any eventuality.
