

Perennial Mats

Meißner Blütenarche

Rapid vegetation establishment and easy installation instantly suppress weed growth, protect the soil from desiccation, and thus minimize maintenance effort and costs. Thanks to its dual function as a fertilizer and water reservoir, a permanent, self-sufficient nutrient and moisture supply for the perennial mats is guaranteed.

Technical Specifications

- delivery size: approx. 40 x 60cm
- 5 mats per m²
- Raw materials: 50% hemp and 50% sheep's wool with a maize-based biopolymer

Installation

- Loosen the soil.
- Remove weeds and level the surface.
- Lay out mats and press down firmly.
- Water thoroughly immediately after installation. Irrigate regularly during the establishment phase, depending on weather conditions

Ordering Information

- Delivery time: 12 to 14 weeks
- Production period: only between May 15th and the beginning of August 1st
- Final ordering deadline: July 31st for delivery within the current calendar year
- Pruning: Cutback in spring and autumn
