

# Backup & Recovery

Immutable offsite backups. Recovery planned for your business.

As a certified Veeam Cloud & Service Provider, we combine local backups with an immutable offsite copy in our own data centre in Germany. We deploy the environment and monitor backup jobs daily.

- Protect the copy - Hardened repositories protect against modification and deletion during the agreed retention period.
- Monitor operations - We respond to failed jobs, missing restore points and capacity issues.
- Plan recovery - Recovery targets, restore tests and restart plans are agreed to suit your operations.

Veeam Cloud Connect with encryption. Microsoft 365 data, including email, OneDrive, SharePoint and Teams, can also be backed up.

## Let's talk about your IT.

Book an initial consultation: your backup strategy and reliable recovery.
