

Cyber security and  
insurance. For complete  
business protection.

# Where we started, where we're going...

## ...and where your business fits in

Eye Security was founded in 2020 to make national intelligence-grade cyber security available to European organisations large and small. Just a few years later, we're proud to have a board with five former national security experts, a fast-growing team of 100+ skilled employees, and offices in the Netherlands, Belgium, and Germany.

At Eye Security, we know that when an organisation falls victim to an attack, there's more than financial and reputational damage – livelihoods are at stake.

Our clients trust us as their security and insurance partner. We earned that trust by making the knowledge of our experts available to organisations of all sizes and at all times. Our work won't be finished until every business in Europe has the protection they need.

## 'We're not selling technology or software. We're selling the security of expertise.'

# Our solutions

Enterprise-level security and insurance,  
for the non-enterprise business

Hundreds of businesses across many industries  
rely on Eye Security – from large carriers and  
manufacturers to professional services and  
healthcare companies.

Developed by security and insurance experts, our  
subscription-based service provides European  
businesses with comprehensive protection and  
support, without the unnecessary complexity and  
cost that often comes with full cyber protection.

Our all-in-1 package offers 24/7 cyber monitoring  
and detection, a response team in the case of an  
incident and cyber insurance. A streamlined  
package of the most impactful security  
measures, it's simple, compliant, robust – and  
the first of its kind to be made affordable.

**'Eye Security has  
the specialist  
knowledge we need  
to protect our  
systems, because  
they are constantly  
working on cyber  
crime and security.  
This allows us to  
focus on what we  
are good at: deep-  
sea container  
transport through  
Western Europe.'**

– Gertjan van der Most,  
founder of Van der  
Most Transport

We work with

# What's included – and why it matters

## What's included

### Open XDR

Our Open XDR platform integrates into your system in hours and offers 24/7 monitoring, detection and response by a team of human cyber experts.

### Cyber Awareness Training

We offer interactive training programs to educate your staff, empowering them to recognise and respond effectively to cyber risks, such as phishing emails.

### Incident Response

Our Incident Response team is here for you, in person, 24/7 in case of a cyber incident to limit damage and get you back to business as soon as possible.

## Why it matters

Cyber criminals operate 24/7, 365 days a year. Only 20% of threats can be dealt with by technology. 80% need expert intervention.

Phishing attacks are on the rise – it only takes one employee to release an attack chain that could cost your business millions.

Even one day of downtime can cost 100,000s EUR. You need to deal with real people, not a ticketing system, email instruction or a call centre.

## What's included

### Intelligence

Through our customer portal, we provide you with clear recommendations for how to strengthen your cyber security.

### Threat hunting

Our intelligence team constantly hunts for new threats. When we identify them, we work with you to make sure you are secure.

### Cyber Insurance

We offer a quick and painless process to buy or renew cyber insurance, so you can mitigate the financial impact of a cyber incident.

## Why it matters

This takes the guesswork out of how to improve your cyber resilience – and reduce insurance premiums – without extra consultancy charges.

We are proactively looking for every opportunity to keep your systems resilient and stay one step ahead of cyber criminals.

1 in 5 non-enterprise businesses are hacked, costing on average €400,000. Cyber insurance is crucial ensure business continuity.

'Every company, of every size,  
deserves access to high-quality  
cyber protection.'

Job Kuijpers,  
CEO and Founder  
of Eye Security
