

## poolmedia GmbH

The MILO Range Training System offers numerous market-leading features for interactive training of recognition, judgment, behavior and reaction. Nowhere else will you find such a realistic and flexible system.

With **500+ training scenarios included**, you have an extensive collection of interactive training courses to choose from.

Classic target shooting, standardized PDV exercises and dynamically adaptable shooting parcours are also included. The **MILO Course Designer software** allows you to intuitively create your own interactive films or 3D based graphic courses within a very short time.

**24/7 support**, on-site user training, and a **2-year warranty** make MILO Range the ideal software for a reliable, safe, and successful training program.

Revolutionary new features for top performance in MILO Range:

- Sharpshooter or laser mode
- optimized for government use
- Highly precise hit detection
- Intuitive creation of HD scenarios
- Automatic mask generator
- Resolution up to 8k with one computer
- Real-time preview for guard observation
- Touchscreen operation
- Windows 11 64-bit operating system

The more realistic the training, the better the results. This is why MILO Range supports a wide range of weapon models and other means of deployment, so that almost every conceivable emergency can be simulated adequately.

- Small arms
- Long guns
- Taser & irritant gas spray
- Baton
- Laser Recoil & Sharpshooting Training
- Low Light Training
- Recording the participants
- Wireless trainer control
- HD and 4K video scenarios
