

Pet Food Guide

Yeast derivatives obtained from strains specially selected from *Saccharomyces cerevisiae*

Biorigin

MACROGARD®

Composed of **60% purified beta-glucans**, **MacroGard** helps maintain animal health and well-being and stimulates the immune systems of dogs and cats. MacroGard is thermostable, easy to use, and can be incorporated into dry, wet, and snack formulations, ensuring effectiveness throughout the shelf life.

- Strengthens the animal's natural defenses.
- Helps reduce the effects of stress.
- Promotes emotional well-being (reduces stress).
- It can help maintain immune balance.

MacroGard is the global reference in immunity.

IMMUNITY

A line of yeast extracts has been developed to improve the palatability of pet food and snacks. **PalaUp helps increase food acceptance and consumption.**

- Differentiates pet food formulas with versatility.
- Offers specific solutions for different species and needs.
- Provides options for dry and wet food, as well as snacks.

PalaUp is the ideal solution to please pets and improve owners' satisfaction.

PALATABILITY

Derived from the yeast cell wall, it is a probiotic solution that helps maintain intestinal health and balance the microbiota. **ActiveMOS** contributes to proper digestion and nutrient absorption, promoting the animal's well-being and quality of life.

- Improves digestion and strengthens the microbiota.
- Excellent cost-benefit ratio with proven results.
- Contributes to intestinal stability and reduces risks of imbalances and infections.

ActiveMOS is the trusted solution for intestinal health in pets.

INTESTINAL HEALTH

Biorigin

INNOVATION AND BIOTECHNOLOGY

For over 20 years, Biorigin has been offering solutions with sustainable and safe ingredients that help ensure quality and improve the health and well-being of dogs and cats. Biorigin uses high-quality yeast derivatives produced through biotechnological processes and advanced technology, **guaranteeing full traceability throughout the entire process.**

COMMITMENT TO SUSTAINABILITY

Committed to sustainability, the company invests in technologies to reduce environmental impacts and promote respect for people and animals.
