

The Next Best Thing to Having an Onapsis Expert in Your SOC

Accelerate Your SAP Security Journey with AI-Powered, Tailored Guidance Based on 15+ Years of ERP and Cyber Data and Experience

Understanding your organization's current state of security for your ERP landscape, how to continuously improve, and how to effectively communicate all of this to your C-Suite and Board can be a challenge. However, as part of your subscription to Onapsis, the Onapsis Security Advisor tackles these challenges for you, providing a single, high-impact view of your current security posture with tailored, actionable guidance on how to improve. Powered by our AI models, dynamic visual comparisons of your posture over time and benchmarking against industry peers make it effortless to track your progress and report more effectively to your leadership.

Spend less time assessing risk and more time acting on it. With the Security Advisor, you get everything you need in one place to establish better security goals, prioritize next best actions, guide your ERP security journey, and demonstrate success.

Gain Benchmarking & Metrics to Demonstrate Success & Support Budget Conversations

- Get high-impact visuals of how your SAP application security compares to other companies, including industry peers, security leaders, and companies who have just started their journey
- Leverage these comparison points to showcase success and prove value to leadership, or help make the case for more resources or greater investment

Get a Focused Strategy for How to Improve, so You Can Focus on Executing

- Gain unique coverage analysis - Quickly identify assets and vulnerability checks that aren't included in your assessments, as well as gaps in your threat monitoring efforts, to ensure you have the most complete visibility into your attack surface and potential risk
- Receive customized recommendations for next best actions to take that will have the highest impact on your security posture.

Communicate Security Progress & Prove Value to Leadership

- Visually showcase how your security posture is improving over time to easily demonstrate success of your team
- Response metrics make it easy to track and report on the effectiveness of your remediation efforts over time
