COOL, CASUAL, CONCEALABLE

The EnGarde® T-SHIRT™ is our newest and most concealable carrier system. Perfect for situations where more casual attire is appropriate and easy to conceal for undercover operations. Many of our customers wanted low-profile protection that did not require an additional undergarment. The advanced Coolmax® Fresh knit fabric means the T-SHIRT™ carrier can be worn as a foundational garment.

The advanced engineering and materials keeps the ballistic armor snug against the torso while keeping the wearer cool and dry. When paired with our FLEX-PRO™ panels, the T-SHIRT™ series provides NIJ IIIA protection while maintaining a smooth, concealable exterior.

While the T-SHIRT™ carrier is compatible with our all our ballistic panel models, we recommend our COMFORT-GEN7™ and FLEX-PRO™ panels for the best combination of comfort and protection.
