

## SEMPER INVICTA

DESIGNERS OF DISCREET ANTI-KNIFE AND BULLETPROOF  
PROTECTIVE EQUIPMENT

Founded in 2021, French company Semper Invicta was born out of the success of the ParaPactum, a protective weapon with the look of a luxury umbrella, unrivalled anywhere else in the world. Adopted by the GSPR (Security Group of the French Presidency), this anti-aggression equipment was imagined and designed by La Manufacture de Parapluies de Cherbourg.

## DISCRETION, ELEGANCE AND HIGH RESISTANCE

Semper Invicta draws its strength from a rich history, skillfully blending tradition and innovation. Charles Yvon, President of the **Manufacture de Parapluies de Cherbourg**, set out to create a range of self-defense products inspired by the success of the ParaPactum: discreet, elegant and invincible.

Based on the observation that high-protection equipment rarely offers elegance and discretion, Charles Yvon collaborated with **Tricots Saint James**, a key figure in French fashion, and co-developed products with **Pangolin Défense**.

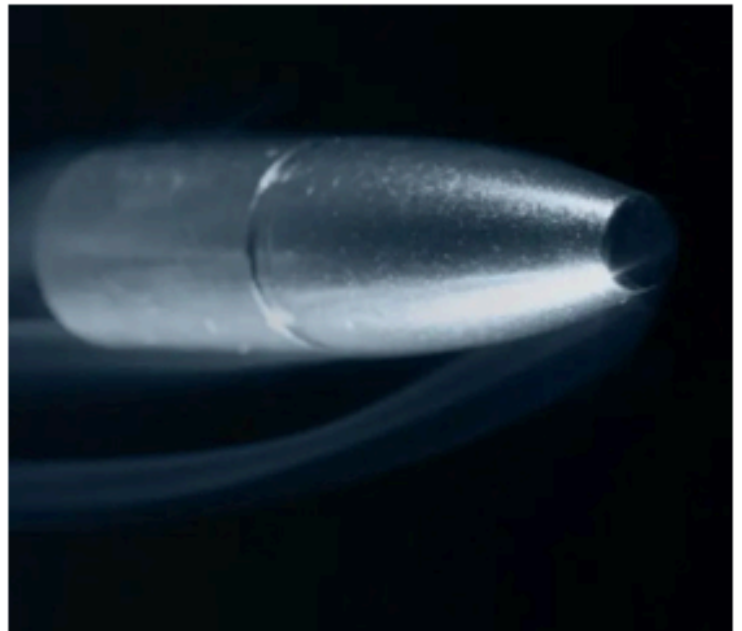

Semper Invicta sells accessories and clothing dedicated to the protection and self-defense of anyone subject to armed violence. Bulletproof down vest, slash resistant pullover, neck warmer and undershirt, pullover with fastening system, tactical bulletproof vest with central opening, discreet bullet-proof vest with side closure, soft insert, ballistic plate, bullet-proof ParaPactum... Tested to the extreme, the Semper Invicta product range is designed to be **discreet, elegant and resistant**.

## INNOVATION

Innovation in protection has guided Semper Invicta since the company was founded.

That is why, after three years of laboratory testing, the French company has come up with innovative technical products that are still unheard of on the safety and protection market: slash resistant and bulletproof protection that are discreet, comfortable and tough enough to stand up to any test.

As the result of innovative, radical and meticulous R&D, Semper Invicta products are designed to meet the realities on the ground.

## QUALITY

Semper Invicta distributes products co-developed with companies renowned for their expertise:

- **Tricots Saint James**, for their century-old expertise in flat knitting, and the elegance and quality of their knits and fabrics.

- **Pangolin Défense**, for their renowned ballistic protection, the lightest and most flexible on the market.

- **Le Parapluie de Cherbourg**, for their unrivalled expertise in the manufacture of its flagship product, the ParaPactum.

## FRENCH MANUFACTURING

Semper Invicta products are made in France by companies labelled **Entreprises du Patrimoine Vivant (EPV)**.

They contribute to preserving jobs in French companies and fight for the relocation that is essential to the sustainability of the national economy and the preservation of excellent know-how.

To produce in France is associated with a number of values: quality, but also guaranteed production conditions, safety and trust.

INNOVATION & CROISSANCE

## Bulletproof Parapactum and slash resistant range: Semper Invicta's spearheads

The essence of Semper Invicta lies in the slash resistant range and bulletproof ParaPactum. These radical innovations are truly ground-breaking feats, requiring three years of intensive research and development. The slash resistant range is based on a revolutionary double-sided knitting technology. This breakthrough allows the application of a variety of exterior materials, offering unparalleled protection.

**Charles Yvon, President of La Manufacture de Parapluies de Cherbourg,** expresses his pride: *"Semper Invicta embodies our commitment to ensuring the safety of individuals, by offering solutions that are both high-performance and aesthetically pleasing. Each product is the fruit of meticulous expertise and a commitment to constantly push back the boundaries of personal protection."*

### THE SLASH RESISTANT RANGE

The slash resistant sweater is an everyday ally against knife and sharp-edged object lacerations. Using a flexible knit with slash resistant knitting, this sweater offers excellent protection to all security and law enforcement professionals, as well as to private individuals.

Featuring double-sided knitting, the pullover is slash resistant yet discreet, elegant and lightweight. The sweater is available in round-neck, V-neck, turtleneck and zip-up vest styles. The range also includes an undershirt and collar.

## THE PARAPACTUM RANGE

The ParaPactum is a defensive weapon in the guise of a luxury umbrella. Compact, strong and easy to deploy, it is **the only product of its kind in the world**. Its exhaustive testing and unbeatable resistance have made it the protective device of choice for high-profile personalities.

Validated and adopted by the GSPR, the ParaPactum can repel crowds, keep potential attackers at bay, ward off dangerous objects, evacuate people discreetly and protect the image of high-profile figures. Available in a bulletproof version, it also protects against firearms (NIJ IIA), making it the **world's first bulletproof umbrella**.

## PRESTIGIOUS CLIENTS

The GSPR's (Security Group of the French Presidency) use of our ParaPactum marks a significant milestone in the brand's history. Semper Invicta's commitment to offering innovative security solutions to personnel providing immediate personal protection to the President of the French Republic has made it a key player in the French security equipment market.

**Semper Invicta will be present at exhibition Enforce Tac 2025**

**Start-Up area - Hall 10 - Booth 10 540H**

### **About Semper Invicta**
