

# THE SOFTWARE FOR SMART OT PROFESSIONALS

Automate the management of your OT clients with solutions from ondeso. We offer production and manufacturing companies reliable OT administration software that has been specially designed for use in industrial infrastructures.

## OT ASSET INVENTORY

**Maintain a complete and always up-to-date overview of all OT clients.**

- ✓ Automated network scans across segmentation boundaries
- ✓ Flexible import and export options
- ✓ Infinitely extendable asset information

## BACKUP & RESTORE

**Realise regular backups and restores according to your own specifications.**

- ✓ Flexible execution options
- ✓ Verification of backup validity
- ✓ Automated clean-up
- ✓ Additional "DriveSnapShot" product license included

## PATCH MANAGEMENT

**Integrate security updates automatically into the ongoing operation of your production.**

- ✓ Use of update lists in accordance with IEC 62443-2-3
- ✓ Integration possible without WSUS or Active Directory
- ✓ Siemens Product Partner for SIMATIC Automation Systems

## CONFIGURATION MANAGEMENT

**Keep an eye on the configurations of your OT clients and be notified of any anomalies.**

- ✓ Check client configurations
- ✓ Automated adjustment of security settings
- ✓ Configuration of local firewall

## SOFTWARE DEPLOYMENT

**Automate the entire software deployment process – from creating the software package to installing it on the endpoint.**

- ✓ Capture installed software
- ✓ Standardised installation and updating
- ✓ Software packaging without programming or scripting knowledge

## INDUSTRIAL IT DOCUMENTATION

**Benefit from a digital knowledge database and create reports in seconds.**

- ✓ Comprehensive logging for meaningful reports
- ✓ Adding additional data, e.g. documents, log files, photos or screenshots
- ✓ 'CV file' for OT assets

## END-OF-LIFE MANAGEMENT

**Manage even outdated software from MS Windows XP SP3 effortlessly and in a standardised way.**

- ✓ Low system requirements
- ✓ User management, even without Active Directory
- ✓ Best possible update management

## WORKFLOW AUTOMATION

**Define workflows and use flexible execution options to avoid disrupting ongoing operations.**

- ✓ Manual execution at the touch of a button
- ✓ In defined maintenance windows (planned/unplanned)
- ✓ Via regular scheduler

# YOUR BENEFITS

Our software is used on over 100,000 industrial PCs worldwide, has well-known manufacturer approvals and has been specially developed for industrial infrastructures - 100% Made in Germany.

Operated on-premise, ondeso SR supports integrated client management from Windows XP SP3 onwards

## Maintain Control

Permanent client overview and ability to act

## Minimise Risk

Centralised implementation of security measures

## Save Time

Reduce workload thanks to workflow automation

## Technical Requirements

### Server

ondeso requires a Microsoft Windows Server 2022 or a newer version as server component as well as a Microsoft SQL Server 2019 Instance. Additionally, a share via SMB, CIFS or DFS is required, which can also be provided on this server. Optionally, an existing active directory can be used for authentication.

### OT Client

On OT clients, at least Windows XP SP3 or Windows Server 2003 SP1, respectively, are required for full functional range. Hardware requirements are 1 physical core, 20 MB RAM and 150 MB hard drive capacity. For Linux, the basic function of inventory is currently offered.
