Dear Customers and Readers,

We are pleased that our image brochure has found its way into your hands and that you want to learn more about Logopak. If you are interested in finding the perfect labelling solution for your business, you have come to the right place. As pioneers in the field of mechanical engineering of industrial labelling systems, we at Logopak have – for many years now – been committed to developing future-oriented solutions that make your production and logistics processes even more sustainable and fit for the future.

What’s more, we have been doing this with significant success: As an innovative company, Logopak recognises trends and their potential early on, and – focussing on our clients’ specific requirements – we develop labelling solutions that are always “two steps ahead”, which has given our customers a competitive edge for over 40 years.

Today, Logopak’s products and solutions ensure efficient, safe and sustainable value chains around the globe, and contribute effectively to creating a well-functioning modern world. Read on to find out exactly how we continue to achieve this. Enjoy!

Wishing you all the best,

Dietrich Barsch
Managing Director

Steffan Gold
Managing Director

THE PERFECT LABELLING SYSTEM.

FASTER. SAFER. GREENER.

For over 40 years, Logopak has been working on making industrial production and logistics processes even more sustainable and fit for the future.

We support our customers around the world with innovative sustainable systems, digital solutions and efficient services along the entire value chain with the aim of making labelling processes faster, safer and greener.

Our brand promise.

Faster.

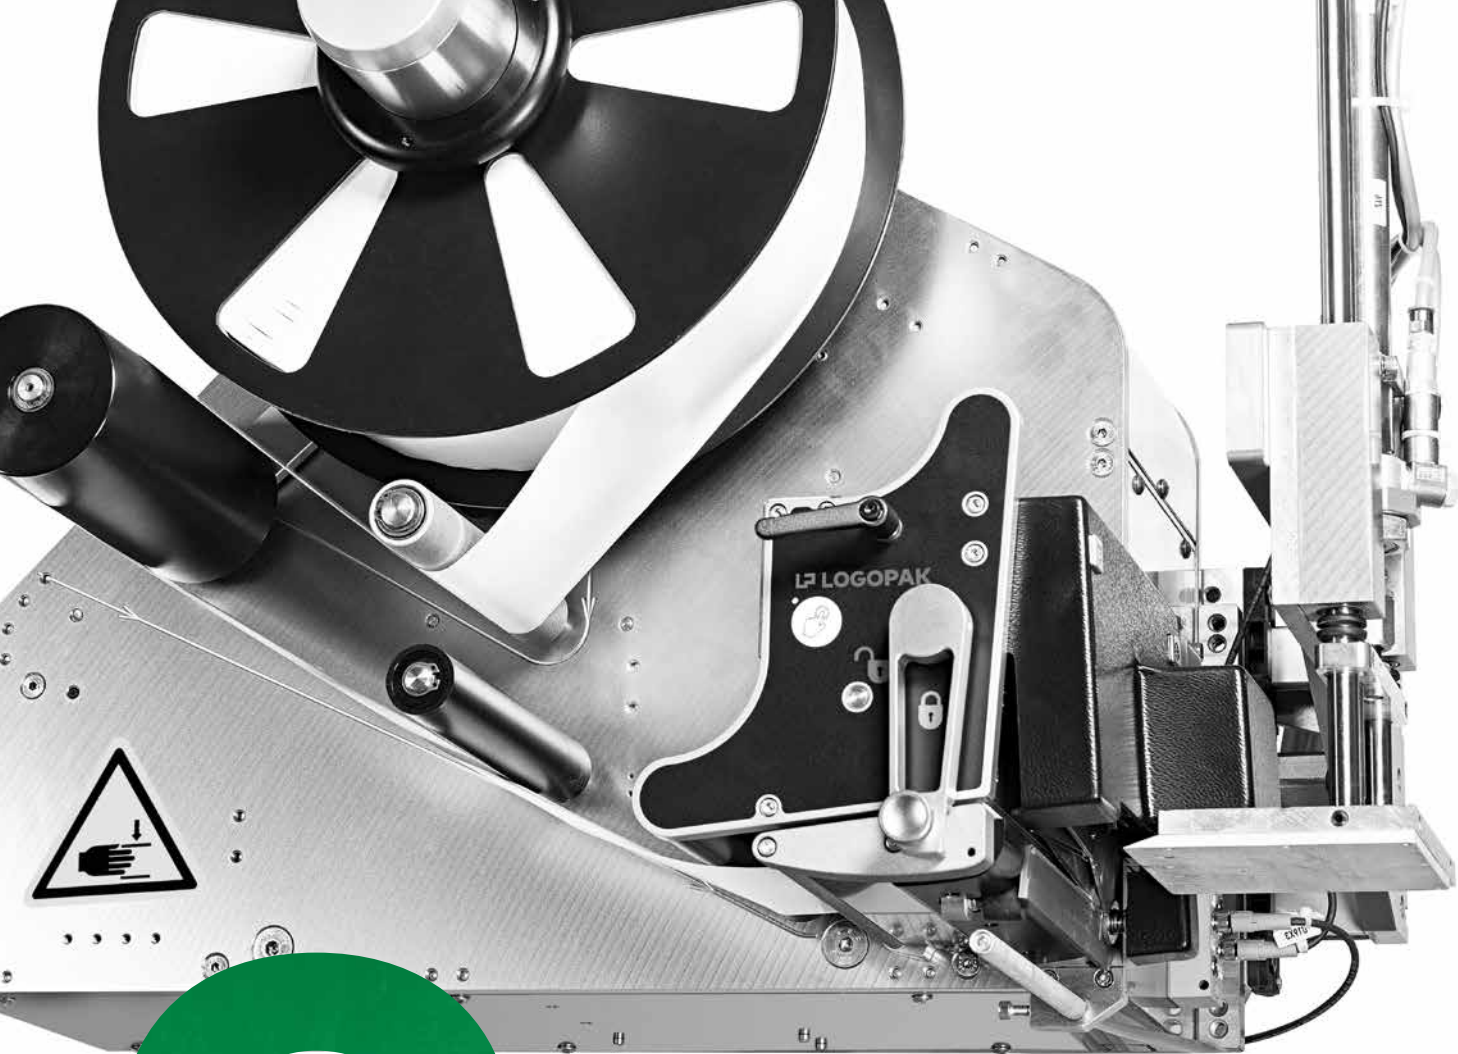

Efficient production processes

Logopak systems provide continuous labelling in real time with up to 480 labels applied per minute. Logopak underscores this high-speed claim with short delivery times and rapid response times in customer support.

Maximum availability.

Both Logopak's hardware and software solutions have been designed for continuous 24/7 use and guarantee fail-safe labelling processes through maximum availability. The combination of safe ERP-compatible data management, high-end quality checks and optimum usability makes Logopak labelling systems the perfect choice for your production processes.

Safer.

For a better future.

We make sustainable and economically efficient labelling possible: with linerless labelling providing substantial savings in terms of material and CO₂ emissions as well as with efficient electronic machine drives, eco-friendly processes, and – last but not least – with our durable labellers that have been designed for an impressively long service life.

Greener.

LOGOPAK – PART OF YOUR ENVIRONMENT

Every single day, Logopak makes an important contribution to ensuring that our world keeps turning the way it does.

Labelling and identification solutions have become an essential element of everyday life.

In our modern society, they are just as important as roads, electricity and the internet. For consumers, labels and tags first and foremost serve as important information carriers, providing information on best-before dates, prices, the product itself or its manufacturer. For companies, however, labelling solutions are intelligent enablers when it comes to controlling production processes or supporting the automation of warehousing and transport logistics, for instance by using RFID technologies to ensure optimal traceability along the entire supply chain.

Faster. Safer. Greener.

Products and solutions made by Logopak:
**To ensure everything
arrives *safely and in time.***

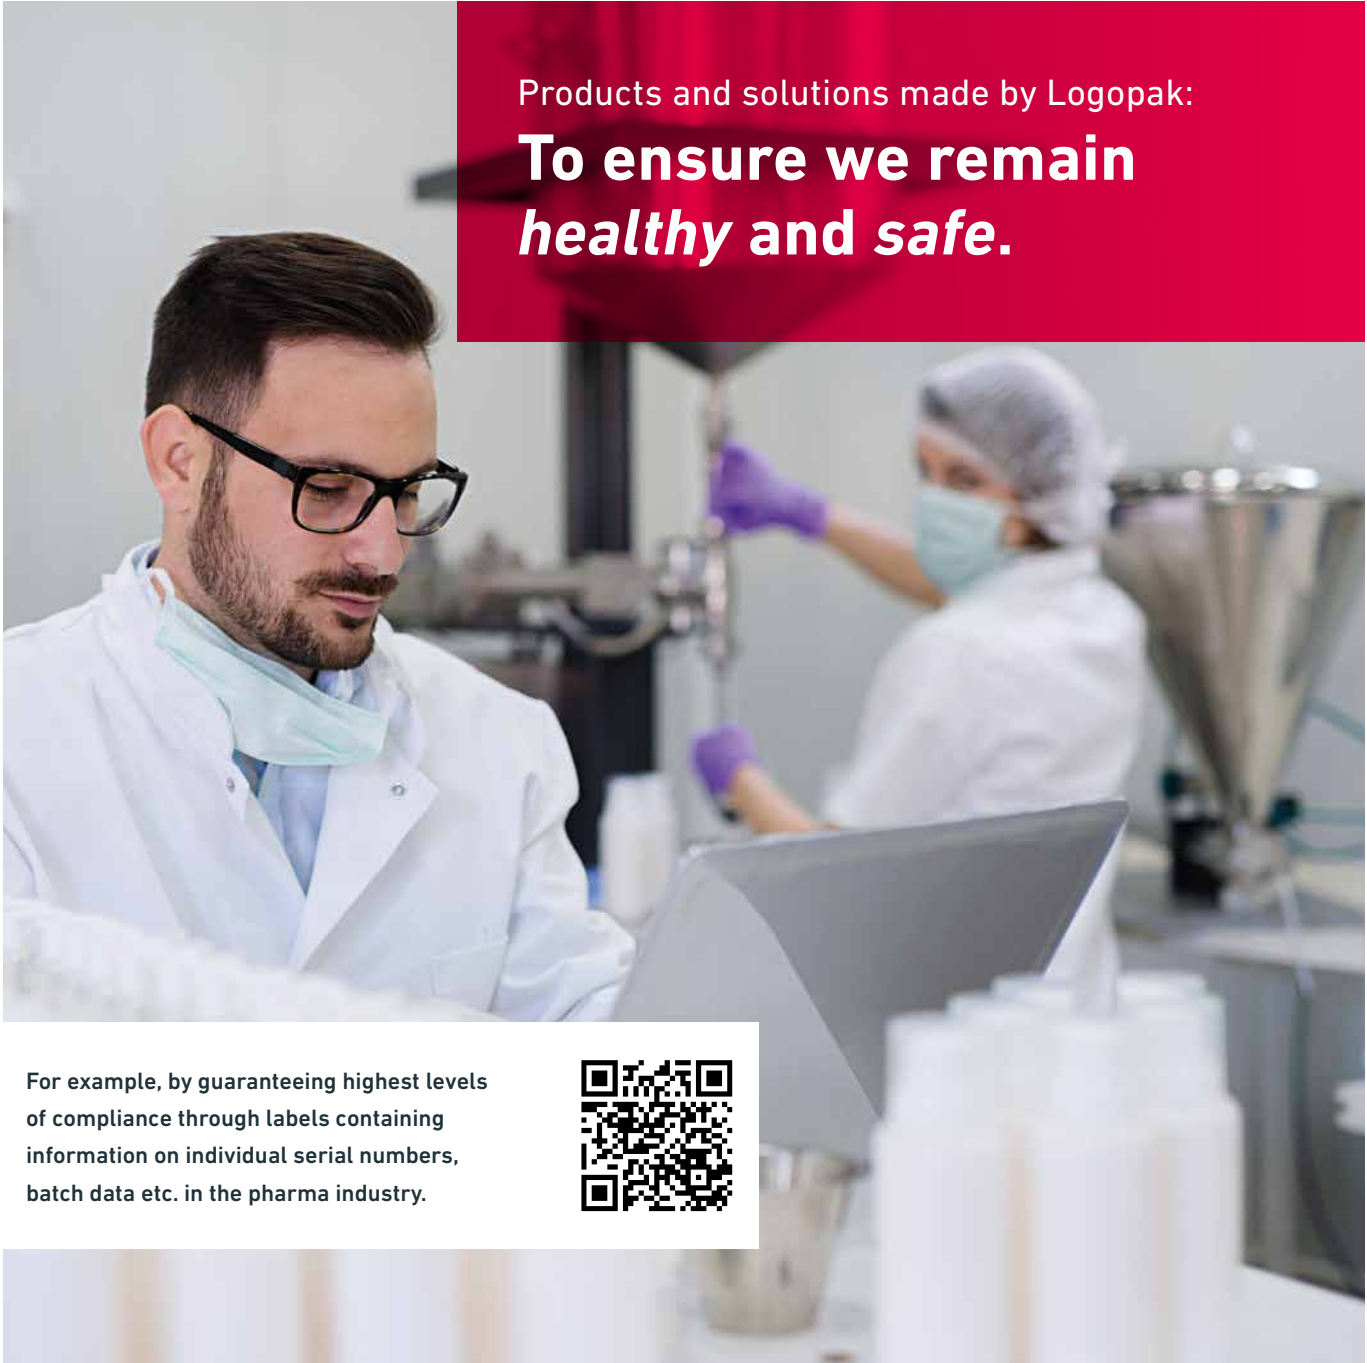

For example, through complete
traceability provided by smart
labelling solutions in the shipping
and logistics industry.

Products and solutions made by Logopak:
**To ensure we remain
*sustainably mobile.***

For example, through reliable and
accurate labelling of parts used in
automotive production.

Products and solutions made by Logopak:

**To ensure we remain
*healthy and safe.***

For example, by guaranteeing highest levels of compliance through labels containing information on individual serial numbers, batch data etc. in the pharma industry.

Products and solutions made by Logopak:

**To ensure we can *safely* identify
our beverages.**

For example, through the precise labelling of trays, packs, kegs, pallets or individually packed products in the food and beverage industry.

LOGOPAK OFFERS YOU ONLY ONE THING: EVERYTHING.

„Faster. Safer. Greener.“ only works with a holistic approach.

Which is exactly what Logopak offers you by providing you with the perfect system for your individual value chain, from production and logistics right down to the end user. From labellers to software, consumables and customer support: Logopak offers you complete system solutions from a single source to make sure you get everything you need for your professional labelling processes.

Your complete system from a single source.

Labelling systems

From a back-up-solution desktop labeller to our high-speed solution for industrial environments: Logopak offers you a comprehensive selection of different-series labelling systems. Manufactured in-house in our own production facilities in Hartenholm near Hamburg, each of our labeller series has been designed to meet the highest standards in traditional mechanical engineering “made in Germany”.

The basic variants of each Logopak labeller series already meet the highest demands in terms of professional labelling. Thanks to our wide range of different applicators available, our labellers can be individually configured and customised to provide you with a tailor-made solution. The combination of 8 different labeller series and 55 applicators enables us to satisfy your every labelling requirement! Please don't hesitate to get in touch. Our sales consultants around the world will be happy to assist you at any time.

Software

Our in-house developed and fully integrated software solution LOGOSOFT enables centralised management, controlling and monitoring of labelling processes – even across different locations. Depending on your individual requirements, our efficient modules support you in implementing your real-time or batch labelling projects and synchronising your database and labelling system.

Uncomplicated integration

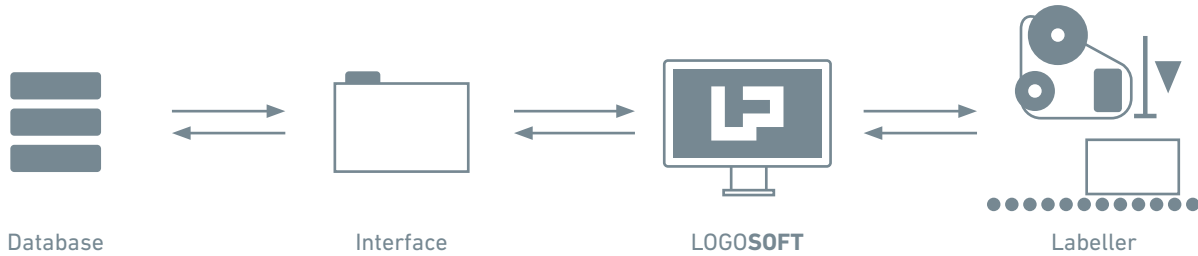

LOGOSOFT can be integrated seamlessly as a middleware or stand-alone solution in existing ERP/MES environments with the most varied requirements – even during running operations. Different data interfaces, making LOGOSOFT compatible with all common programmes (i.e. SAP®), ensure easy integration.

Transparent processes

LOGOSOFT enables you to read, control and monitor all labelling processes centrally. The system supports all common barcode and RFID standards to give you full transparency over your real-time data at all times in order to ensure optimum traceability of all units.

Increased reliability and availability

As a database middleware, LOGOSOFT optimises processes and increases reliability to ensure maximum availability along your supply chain.

SAP® is a registered trademark of SAP® SE. All other names of products and services are trademarks of the respective companies.

Original labels for perfect print results

Consumables

Ensuring a label's reliable readability over long periods of time largely depends on selecting the right labelling material. With over 40 years of experience in our in-house test lab, our specialists develop the perfect label for every requirement. Whether paper or plastic, standard or special adhesives, large or small formats – Logopak labels are ideal for a wide range of applications. We use only reliable and high-quality materials that have been specially designed for use in industrial environments. What all Logopak labels have in common is their superior quality and optimum readability.

The perfect solution for every application

- » Wide selection of labels for every requirement
- » Best possible print quality and readability
- » Perfectly adapted to all Logopak systems
- » Increased efficiency and availability of your labellers
- » Available around the globe, rapid delivery
- » Sustainable product design through FSC and PEFC certification
- » Go Green: eco-friendly linerless labelling

Service

Logopak employs more than 300 people worldwide. Our global network ensures that our competent and certified service staff are always quickly available whenever you need us. From planning your projects to commissioning your systems or carrying out maintenance and repair work: Logopak is always there for you!

Maintenance

We offer you maintenance scenarios that meet your individual requirements: regular checks and preventive maintenance by one of Logopak's experts.

Repair service

We offer you a close-knit network of internationally located field technicians coordinated by Logopak.

Remote maintenance

In many cases, we are able to diagnose and rectify errors via remote access. Logopak's customer support specialists can access the faulty machine via the internet to get an overview and take further action as necessary.

Spare parts

In order to reduce downtimes to a minimum, Logopak offers you a wide range of spare parts. We guarantee direct availability of all spare parts in original manufacturer quality for a period of 10 years.

Training courses

Logopak offers you a comprehensive training programme to make your employees fit for the most efficient use of Logopak labelling systems, which is the best basis for ensuring reliable 24/7 operation of your Logopak system.

**Reliable support –
all around the world**

OUR EMPLOYEES ARE OUR GREATEST ASSETS.

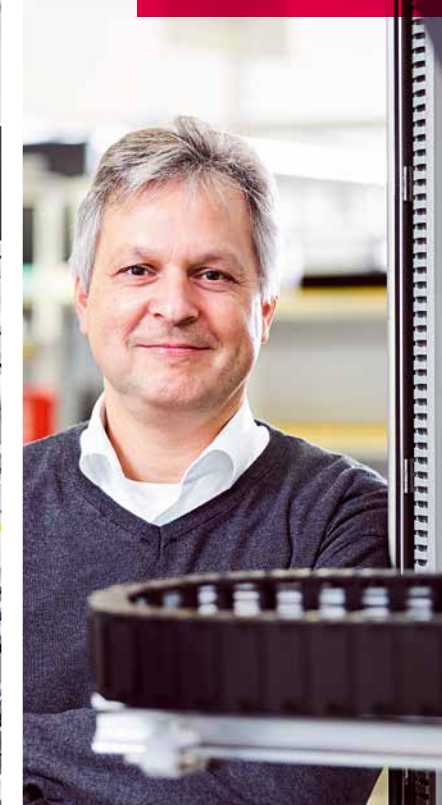

Logopak Know-How: Behind every good idea and each good solution is at least one clever head.

As a logical consequence, investing in the promotion of junior staff and the further professional qualification of our employees is very important to us. This is reflected in the high percentage of apprenticeships within our company and the long-term loyalty of our staff, which we are particularly proud of.

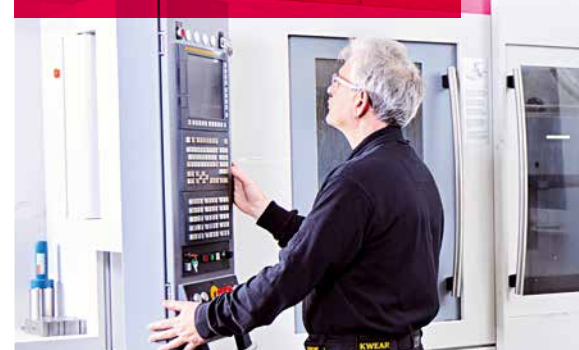

Elvan Mülazim, electrical and mechatronics engineer, enjoys teaching trainees.

Carsten Schweder, design manager, loves reliability.

Andreas Langer, CNC machinist, turns great ideas into perfect solutions.

Nadine Eddelbüttel, electrical designer, likes to solve tricky problems.
