

Continuous Offensive Security Testing

The attack surface never stands still. Neither should your security.

Change isn't coming—it's already here.

Every release, every AI-powered application, and every new network connection expands your attack surface. Attackers move continuously, adapting as fast as your business does. Point-in-time testing can no longer keep pace.

Modern security demands continuous validation of what is truly exploitable, not just what is vulnerable.

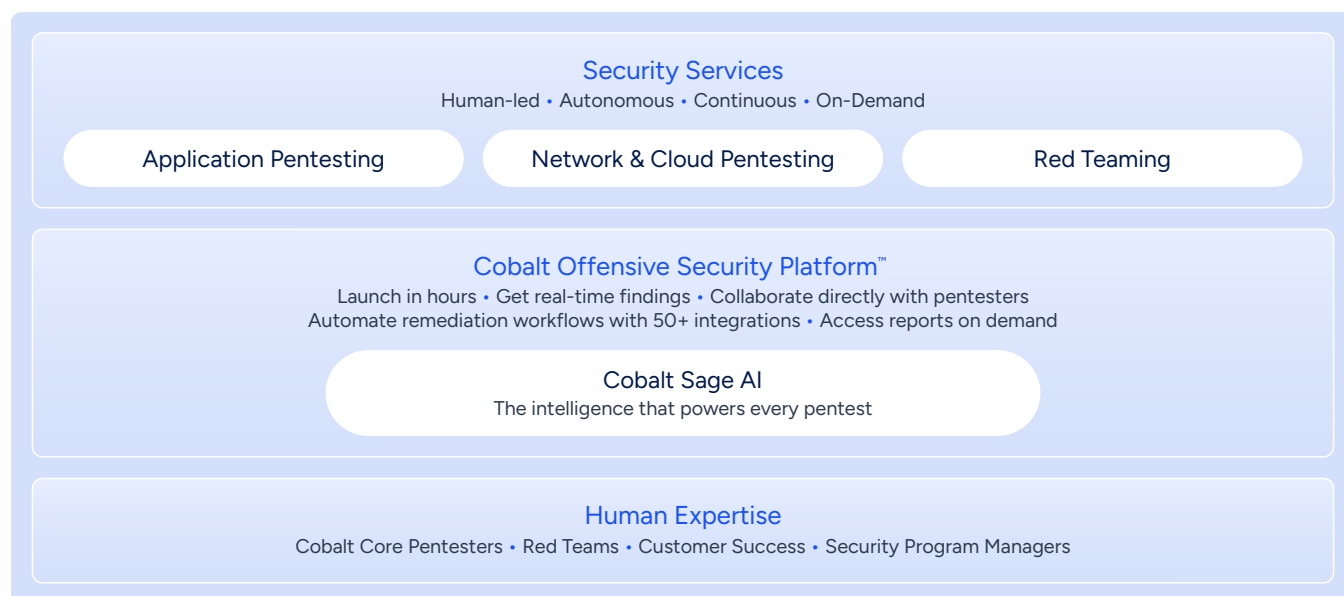

Only Cobalt unifies the four critical elements of modern offensive security: elite human expertise, a context-aware platform, AI-powered orchestration, and the industry's largest dataset of real-world pentest results. Together, Cobalt enables security teams to continuously identify, prioritize, and remediate exploitable risk at the speed of modern software development.

"Cobalt has redefined what it means to be a leader in offensive security."

Jon Cheuvront, Gallagher

From PTaaS to continuous offensive security

Define your scope, testing type, and cadence. We build the program and deliver the results.

The power of Cobalt

AI-powered offensive security testing grounded in human expertise.

Fast enough for every release, flexible enough for your full portfolio, and precise enough to act on.

Fast

Security at the speed of change

Bring new ideas to market faster. Go from scope to active pentest in hours and see findings in real-time.

Flexible

Scale continuous testing

Scale your testing program as fast as your business grows. Choose frequency, depth, and type of testing based on asset-criticality and desired outcomes.

Precise

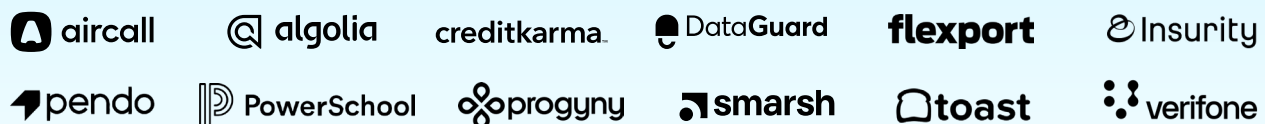

Precision every time

Protect your business against today's evolving threats. The right expert, for the right test, every time.

Recognized by analysts

- Named both **Leader** and **Fast Mover** in *The GigaOm Radar Report for Penetration Testing as a Service, 2025* (fourth consecutive year as a Leader)
- **Platinum ranking** in the *EMA Prism PTaaS Report, 2025*
- Recognized for the third consecutive year in the *Gartner® Hype® Cycle for Security Operations, 2026*
- Recognized for the third consecutive year in the *Gartner® Hype® Cycle for Application Security, 2025*
- Recognized for the third consecutive year in the *Gartner® Hype® Cycle for XaaS, 2025*
