HELLO!

WE'RE MACAHL ANIMAL HEALTH

Macahl Animal Health is a family business based in Northern Ireland, established in 2006 by John and Anthony Mackle. Initially, the company started as JAM Animal Health, and in 2015 Macahl Animal Health was formed to manage the manufacturing, distribution, marketing, and technical support for our veterinary product range.

The company initially developed innovative Oral Rehydration Solutions (ORS) to support dogs and cats experiencing gastrointestinal (GI) upset. The first isotonic drink was created after working with an expert in pet nutrition and product development, as well as experience in the human sports drinks sector. The brand Oralade® launched in 2008, with a highly palatable natural chicken flavour, purified water, simple glucose, nutritious ingredients and free from preservatives. Its unique formula changed how ORSs are made in the animal health sector.

Today, Oralade® is distributed in over 60 countries worldwide, and the company continues to grow, developing new products and entering new markets.

At Macahl Animal Health, we strive to provide the best products, services, and support to all our customers. With GMP+ accreditation in the manufacture of complementary feeds, we guarantee the quality and traceability of our product ingredients, from source to bottle.

Our philosophy is to promote new and innovative products that support a happier, healthier life for your pet.

Specially formulated Oral Rehydration Solution for dogs and cats. Hypoallergenic and naturally chicken flavoured, making it highly palatable even for unwell pets. With electrolytes, simple sugars, essential amino acids and nutrients to promote gut health and support recovery. The unique formula is isotonic, ensuring easy absorption for rapid hydration. Available in GI+ or RF+ support.

Advanced electrolyte drinks for active or working dogs. The unique isotonic formula quickly replenishes essential fluids and electrolytes, providing fast-acting hydration. Simple glucose and the nutrient L-Carnitine help promote endurance, replenish energy, and support recovery. Available in three exciting, hypoallergenic flavours: Duck, Chicken & Vegetable.

Gravy toppers made with real meat and natural, hypoallergenic ingredients. A rich treat, yet low in fat and salt, with no nasties added. Available in two tasty flavours: Roast Chicken & Veg with Omega Fatty Acids for skin & coat, or Roast Lamb & Veg with prebiotic fibre for digestion.
