coating

Decorative  
surfaces

Stationary

Tailor-made  
solutions

We regularly evaluate our energy use and the consumption of raw materials throughout the entire production process and company. Since it is important to us to save resources and protect the environment, we use energy recycling and use recyclable materials in our manufacturing processes.

## Sustainability

**2020**

Start of production of  
the lightweight  
composite material  
Progano in the newly  
built plant in Greiz,  
Germany

**progano**<sup>®</sup>  
Lightweight Composite

PROFOL PERFORMS

## That is our promise.

And we do what we say. That is the basis for the long-term customer relationships at Profol. We don't make claims. We make innovative polyolefin cast films and sheets that solve real problems. And we deliver these products with personalized service and support at the highest level to make your job easier. That is the Profol promise.
