SELF-PROPELLED LEAF VACUUM & CHIPPER

- **Self-propelled Driving System:** Reduces manual effort by automatically advancing the machine, even on sloped or uneven lawns. Perfect for navigating around gardens, flower beds, or walkways while cleaning wet leaves.
- **Versatile 3-in-1 Functionality:** This all-in-one machine integrates three key yard maintenance functions to streamline cleanup.
 - Leaf Vacuuming: Efficiently suctions both dry and wet leaves, with a design that prevents wet leaf clogs in the airflow path.
 - Chipping: Turns branches, twigs, or leftover leaf clusters into fine mulch.
 - Side Brush: A built-in side brush sweeps scattered wet leaves toward the suction nozzle.
- **Emergency Stop Button:** Provides instant shutdown in case of jams or unexpected issues, ensuring user safety.
- **Ergonomic Control Lever:** Allows easy adjustment of suction power, driving speed, and brush operation.

Impeller Size

The vacuum snout features three adjustable height levels

The side roller brush handles leaves that are hard to directly suction from road curbs

Easily chips small branches up to 50mm in diameter

The control lever enables forward and reverse operation of the machine

Safety device for emergency situation

Effortless maneuvering with self-propelled drive system
