

# The Mono-Material Milestone

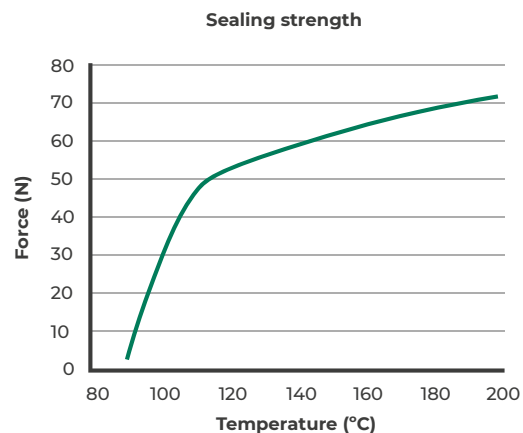

# CPSeal for sachets, stand-up pouches, flow-packs – redefined.

Start now into a new packaging era. The innovative cast PP films of the CPSeal® series allow packaging manufacturers to create solutions for recyclable mono-material packaging based on the use of only one material: **Polypropylene**. Make no compromise and contribute to the „European Green Deal“.

## Applications

- Flow-packs and pouches for VFFS-packaging machines
- Stand-up pouches (doypacks) with or without spout as well as flow-packs for HFFS-packaging machines
- Sachets

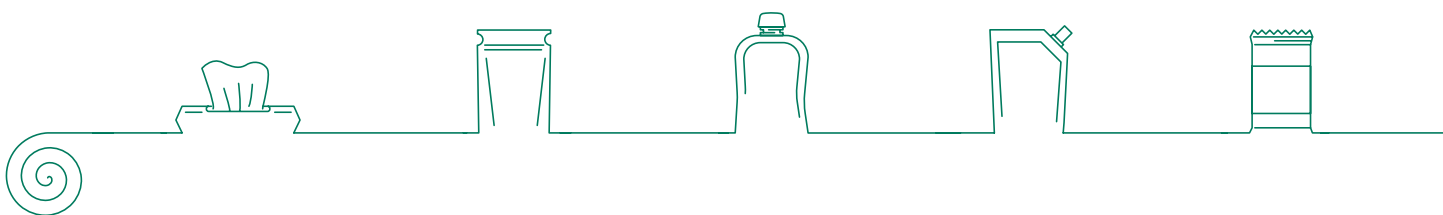

CPP + BOPP  
DIN 55529, sealing seam 25mm, sealing time 0.5s

## Important functions

- + Soft or rigid grades
- + Excellent printability
- + Reliable drop test performance
- + Thermal sealing, seam welding or ultrasonic welding

## Specifications

- + Profol recommends CPSeal in 30 or 70µm
- + Colors: Transparent and white
- + Film solutions based on recyclate possible (ISCC Plus certified)
