CANDERA
CGISTUDIO

Candera CGI Studio is a **high-performance**, **scalable**, and **hardware-independent** HMI software toolchain. The **designer-centric approach**, with its **built-in WYSIWYG editor**, **no-coding methodology**, and the **award-winning AI-assisted Importer** of Candera CGI Studio gives you and your team the freedom to create customizable embedded graphical user interface (GUI) solutions for a wide range of projects and products.

Full Feature Set

- **Fast:** Award-winning AI assisted Candera Smart Importer
- **Easy:** No Coding – WYSIWYG (what you see is what you get)
- **Best Performance:** State-of-the-art rendering engine and HMI software platform
- **Scalability:** across HW platforms, operating systems (OS or no-OS), teams, HMI solutions and more
- Brilliant & customizable embedded GUI
- High-performance rendering engine for OpenGL and native GPU interfaces
- Faster time2market

CAR.HMI AWARD WINNER

Scene Composer	Smart Importer	ISO26262	CGI Player
