# WH IS IMBAT?

## ABOUT US

Imbat is a leading HVAC manufacturer based in Izmir, Türkiye, established in 1991. With more than 35 years of engineering expertise, Imbat develops and produces a broad range of climate solutions, including rooftop units, chillers, close control systems, mobile cooling units and data center cooling technologies.

Exporting to over 50 countries, Imbat has built a reputation as a reliable partner known for high-quality, energy-efficient, and sustainable products. Backed by strong R&D capabilities and international certifications such as Eurovent, Imbat consistently exceeds industry standards. Imbat's goal is not only to meet customer needs but also to shape the future of HVAC by delivering innovative, efficient and environmentally responsible solutions.

# WH IS IMBAT?

## OUR STORY

Our journey began in 1991 with a passion for engineering, innovation and creating solutions that make a difference. More than three decades later, we remain true to this spirit. Today our story is defined not only by what we build, but by the values that guide us.

We are committed to efficiency, reliability and sustainability. Every unit we design reflects our belief that technology should serve both people and the planet. With our Eurovent-certified products, advanced automation and R&D-driven approach, we deliver HVAC solutions that exceed international standards while adapting to the specific needs of every project.

As a second-generation family company, we place people at the heart of what we do. Our customers,

partners and team members are the foundation of our success. We invest in strong relationships, transparent collaboration and continuous learning; because we know progress is achieved together.

Looking ahead, our goal is clear: to continue pushing the boundaries of energy efficiency and climate responsibility, developing technologies that support a greener, more sustainable future. From rooftops to data centers, from mobile units to aviation solutions, we are shaping tomorrow's HVAC industry today.

For us, innovation is not a milestone, it's a mindset. And with each new step forward, we reaffirm our promise: **Efficiency is designed here.**

- ● Imbat has completed more than one third of its goal of being a
- ● 100 year old company...

# WH IS IMBAT?

## OUR CORE

### LEADING WITH PRECISION AND PURPOSE

Imbat combines cutting-edge engineering solutions with a commitment to sustainability and human-centered design. Our goal is to create products that not only excel in performance but also contribute to a more livable world for future generations. By focusing on innovation, precision and sustainable engineering practices, Imbat aims to lead the HVAC industry and make a lasting positive impact.

### OUR MISSION

Imbat is committed to continuous investment in R&D and technology to deliver high-quality, competitive solutions that exceed industry standards. Through innovative, flexible and energy-efficient designs, we create lasting value for our customers, employees, partners and the environment.

### OUR VISION

Imbat's vision is to be a global leader in delivering innovative, efficient and environmentally responsible solutions.

# WH<sup>©</sup> IS IMBAT?

## OUR VALUES

### INNOVATION

As a leading brand in the HVAC industry, Imbat is driven by a passion for R&D-focused solutions, constantly pioneering new and efficient designs. We believe innovation means anticipating customer needs even before they are expressed and delivering solutions that set new standards. Our highly skilled engineering team pushes the boundaries of technology, combining years of expertise with fresh thinking to create flexible, advanced and precise solutions that respond to the evolving demands of the industry.

### SUSTAINABILITY

For Imbat, sustainability is more than environmental awareness, it is a long-term commitment to building strategies and investments that secure the future. We use global resources responsibly, designing high-performance, energy-efficient products that minimize environmental impact. Sustainability stands at the forefront of our vision, guiding every decision we make and every technology we develop.

### KINDNESS

Kindness at Imbat is not limited to personal interactions; it shapes our company culture and reflects the way we conduct business with care, respect and responsibility. By placing people at the center of our approach, we ensure that employees, customers and partners are all deeply valued. This mindset strengthens trust, supports satisfaction and fosters a positive culture that helps our organization remain strong and resilient.

### EFFICIENCY

Efficiency is at the heart of everything we do. By integrating innovative technologies into our solutions, we maximize value for our partners and promote sustainable growth for the future. Every product and service we deliver is designed to save energy, optimize performance and provide long-term reliability.

### INTEGRITY

Since 1991, integrity has been a cornerstone of Imbat's identity. With deep respect for our heritage and a constant drive for development, we hold transparency and trust as guiding principles. Integrity enables us to build lasting, dependable relationships with both our employees and our business partners, reinforcing our reputation as a leader in the industry.

### COLLABORATION

Collaboration lies at the foundation of our success. Within our teams and with our business partners, we work in harmony to increase efficiency and create innovative solutions. Over the past three decades, we have built strong relationships based on trust, enabling us to grow into a global brand with a presence in more than 50 countries. This spirit of collaboration continues to fuel our progress and strengthen our role in the global HVAC market.

# WHERE IS IMBAT?

## IMBAT TO WORLD

Imbat operates effectively across a broad global landscape. Our company has a strong presence in international markets, successfully exporting our products to numerous countries.

Our sustainable sales policy focuses on providing dedicated after-sales services, distributor agreements and local support tailored to each country, ensuring the highest level of customer satisfaction. Imbat's global strategy is designed to meet regional needs, enabling us to deliver high standards of products and services everywhere.

Our international achievements reinforce our position as a reliable partner worldwide and demonstrate our ability to provide effective solutions for diverse market demands.

# MILESTONES

## WHAT WE ACHIVED IN 35 YEARS?

Imbat's 35+ year journey has been shaped by continuous innovation and bold steps. From the beginning, we have pushed the boundaries of engineering and technology, redefining industry standards with every step. Each milestone has not only marked a success but also signified a bold vision for the future. Our past innovations have crafted our present and opened doors to future opportunities. Now, building on this strong foundation, we will continue to lead in technology and innovation, shaping what's next.

# THIRD PARTY VALIDATIONS

## BUILDING FOR A BETTER WORLD

At Imbat, we are dedicated to maintaining the highest quality standards across every stage of our operations. Each year, numerous factory acceptance tests are carried out at our facility, allowing partners to witness the reliability and performance of our products firsthand.

Our commitment to quality is further reinforced by an extensive portfolio of third-party certifications. These validations, issued by leading global and national institutions, cover everything from manufacturing processes and documentation to data security and product performance. They demonstrate not only our compliance with international standards but also our drive to deliver innovative, dependable solutions.

Beyond meeting expectations, Imbat helps define them. As a Eurovent Corporate Member and through active participation in Eurovent's management, we play a leading role in setting industry benchmarks for energy efficiency, performance and environmental responsibility in the HVAC sector.

Imbat rooftops participates in the Eurovent certification programme. The models are listed in the Eurovent directory, please check website: [www.eurovent-certification.com](http://www.eurovent-certification.com)

# SYSTEM SOLUTIONS

## EFFICIENCY BY SYSTEM SOLUTIONS

Imbat approaches climate control not as individual products, but as integrated system solutions. With its wide portfolio including rooftop units, chillers, close control systems, mobile cooling units and aviation air conditioners Imbat designs every component to work together seamlessly.

From initial design to production and testing, all units are developed in-house and delivered as fully synchronized systems. This ensures higher energy efficiency, faster commissioning and the convenience of a single point of service. By combining flexibility with advanced automation, Imbat provides tailored solutions for diverse applications such as factories, hospitals, airports, shopping malls, storage facilities and arenas.

With over 35 years of expertise, Imbat creates climate systems that are reliable, efficient and sustainable, offering complete comfort and performance in every environment.
