COMPANY OVERVIEW

IT security for SMEs

Personal support. Reliable operations. Planned recovery.

Since 2008, we have helped small and medium-sized businesses operate reliable IT. Our own technical team, dedicated contacts and a data centre in Germany connect security, infrastructure and ongoing support.

Managed Security / MXDR

24/7 detection and response by a German SOC. We deploy and manage the solution and integrate it with firewalls, email protection and recovery.

Backup & Recovery

Local backup plus an immutable offsite copy in our data centre. Daily job monitoring; recovery tests and restart planning by agreement.

ISO/IEC 27001:2022 certified company · Server, storage and network infrastructure · Managed IT services · AI and custom software development

Let’s talk about your IT.

Book an initial consultation: protection, IT operations and recovery.
