## GLOBAL PRESENCE

*Already exporting  
in 7 countries  
and the feedback is  
absolutely exciting!*

## About us

PMS AKADIMOS is a manufacturing company, located in the Industrial Zone of Oinofyta, in central Greece. The entire production process, our storage facilities and our administration offices cover a total area of 4000 m<sup>2</sup> in modern spaces that guarantee the highest quality of our end product.

### Operating in the following sectors:

- Paper food packaging
- Production of corrugated paper and paperboard
- Flexographic and Offset Printing

The company was founded in 2010 by mechanical engineer Petros Kavalakis who, drawing from his **family's long tradition in paper packaging**, had envisioned the creation of a state-of-the-art company which would manufacture unique, **innovative and reliable paper packaging** products while showing the **utmost respect for the environment**.

The people of PMS AKADIMOS are experienced, specialised and committed to their field of expertise.

**Specialisation – Innovation – Differentiation** are the three defining elements of our successful business course. The team and the products of PMS AKADIMOS are valued by many distinguished and experienced members of the paper packaging market. Proof of this, is our long-term cooperation with the largest box manufacturers, packaging traders and catering chains in Greece.

# Strategy & Vision

In PMS AKADIMOS we share a common vision:

“**Always look for the most advanced product and achieve new milestones.**”

## Strong position in the domestic market

Our goal is to maintain and consolidate our position in the domestic market as a competitive and innovative company while broadening our clientele.

## New eco-friendly packaging

In parallel, our company works relentlessly towards the enhancement of its Research and Development department in an effort to provide its clients with new, improved and certified products that comply with the Greek legislation and the EU guidelines on healthy and ecological packaging.

## Competitive advantage

In order to obtain a competitive advantage our company tries to find intelligent ways to reduce costs and aims at placing unique and exclusive products on the market.

## Respecting the environment and supporting circular economy

Our goal is to manufacture ECO-FRIENDLY and RECYCLABLE products. We are firm supporters of the circular economy and sustainable development model aiming at improving the standard of living of all people through a more intelligent use of resources in a modern economy that contributes to the welfare of the population.

## Investing in people

Investing in human resources is the key to the success of any small or large business. One of the main goals is to provide employees with the opportunity to enhance their skills and know-how through specialised education and training programs.

## Exports

Already exporting in 7 countries in Europe and North America, one of PMS AKADIMOS' short-term goals is to enlarge its export network, as it has always been an outward-looking company.

# Quality Assurance

Quality assurance of products and services is at the very centre of PMS AKADIMOS' production process.

According to that principle, our company has developed and applies a Food Safety Management System according to the ISO 22000:2018 international standard and the basic HACCP requirements.

With continuous staff training on safety and proper production process and by performing continuous on-site and laboratory inspections, the specialized team of our Food Safety Management System guarantees that our products and services meet the highest quality standards and comply with national and EU legislation.

Our company issues a statement of conformity to its clients – associates where an explicit declaration is made for the proper application of hygiene rules that govern the production process and for the compliance with food safety regulations of the materials it processes.

# Enviroment

Remaining faithful to sound environmental management and committed to sustainable development is the only way for any modern business, regardless of its size. Thus, reducing the environmental footprint is a key concern of PMS AKADIMOS.

All of our solid and liquid waste is forwarded to certified recycling companies.

On an annual base, our company sends for recycling approximately 120 tonnes of paper.

All suppliers are carefully selected in order to guarantee that they meet all required specifications on paper and paperboard sourced from certified renewable forests

Our company is certified against FSC-STD-40-004 since 2021, actively supporting responsible forestry

**PIZZA PAD** is an open-flute corrugated 100 % virgin kraft paper intended to be used as an insert base into Pizza Boxes.

**Innovative** because it absorbs all greasy substances and keeps the pizza dough crispy and ensures a holistic food-safe packaging.

**Quality features**

- Direct food-contact suitable
- Plastic-Free
- 100 % Recyclable monomaterial

**Other specifications**

- Can be customized at any pizza-box dimensions
  - Maximum serving temperature 90°C
  - 2 mm corrugated thickness
- Delivered in shrink-filmed packages of 200 units or 5 kg

# Special Application

We also manufacture products for food industries with special needs.

Our inner and outer white greaseproof corrugated pad is a perfect insert for biscuit packets and similar fatty pastry products.

Made of 100% virgin kraft paper for direct food contact.

Available in any requested diecuts or reels.

# Stock Orders

All product categories include a **generic use** series of the most common dimensions.

In our 1000-pallet-capacity warehouse, there are plenty of them, always available for shipping.

Make your trial order, including any quantity of the products you might be interested in.

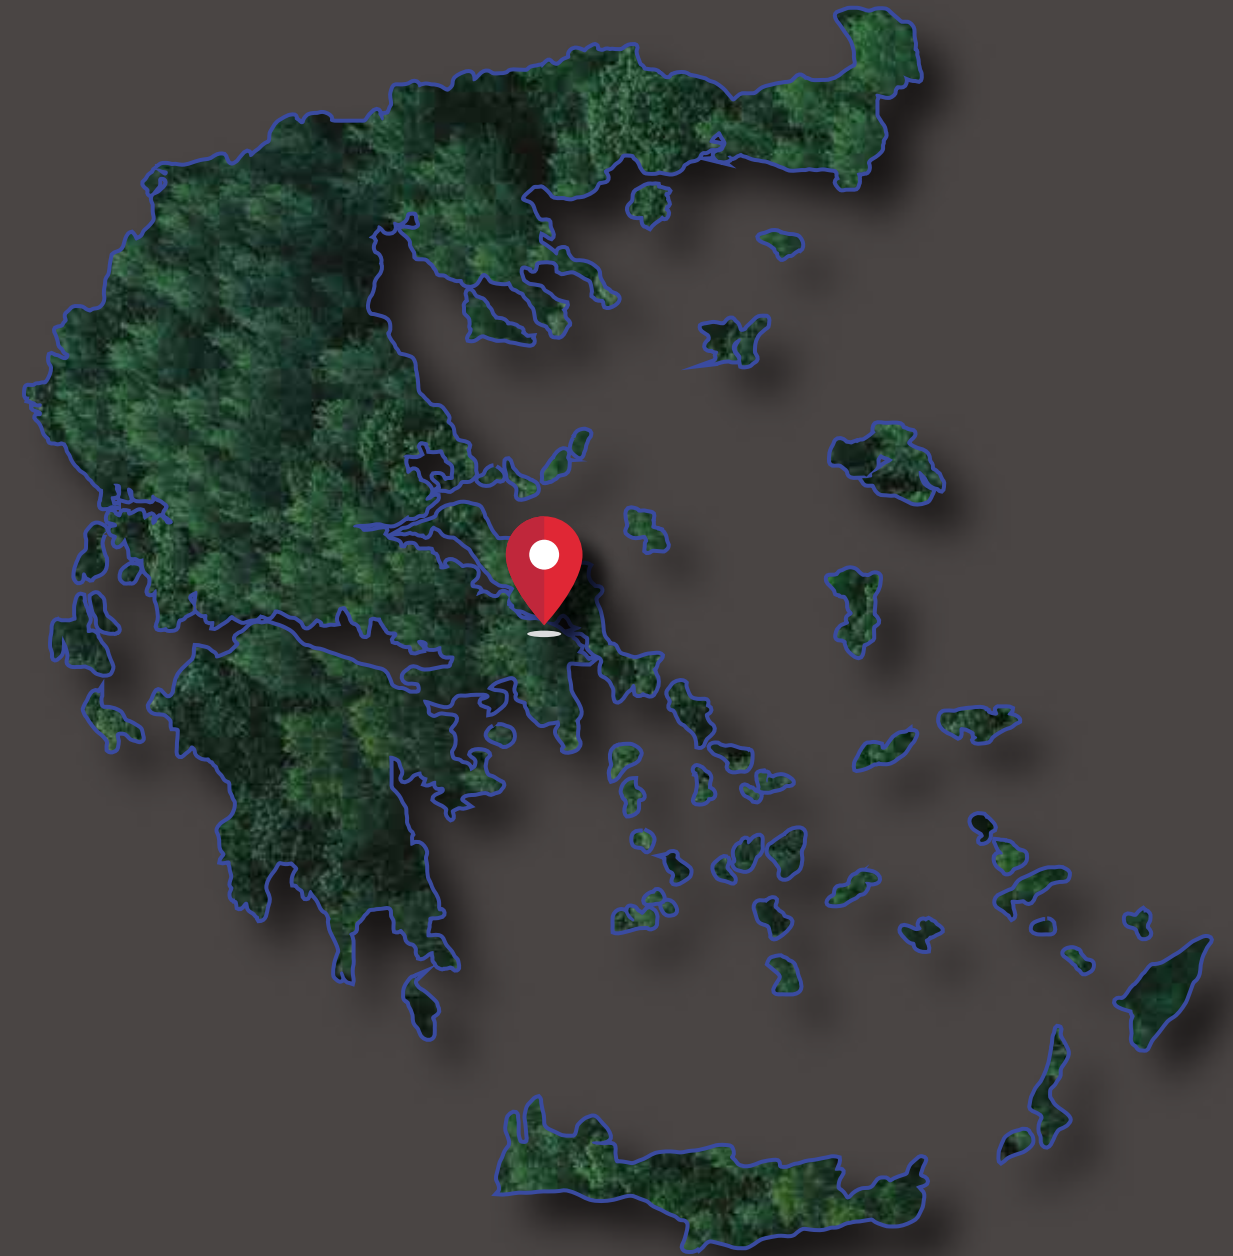

# Customization

As a vertical manufacturing company, we can provide you with pizza pads and boxes of your preference.

Dimensions, diecuts and print-designs can be adjusted to your very special taste and needs.

Your private-label boxes will make you **stand out** and **impress** your clients.
