agilimo

Protected around the clock –
with Security Operations by agilimo.

Systematic Cybersecurity: 24/7 monitoring, automated forensics and scalable services tailored to your business.

When every second counts: We keep you operational – even in critical situations.

IT systems are constantly targeted by cybercriminals – and attacks are often difficult to detect. The consequences range from operational disruption to existential threats.

A Security Operations Center provides the visibility and responsiveness needed to react in time.
As an external SOCaaS (Security Operations Center as a Service), agilimo ensures proactive defense – scalable, available around the clock, and operated entirely in Germany.

Who benefits from a Security Operations Center?

Mandatory for some. Valuable for all with elevated protection needs.

- Organizations in critical infrastructure (KRITIS)
- Mid-sized businesses with growing risk exposure
- Companies with 24/7 operational requirements
- Organizations that don't want to rely solely on basic protection tools
- Companies subject to NIS2 regulations

Your advantages with SOCaaS

agilimo as a Managed Security Service Provider (MSSP):

- 24/7 monitoring by a German-based Security Operations Center
- Automated cyber forensics and incident escalation
- Compliance with BSI, NIS2 and ISO 27001
- Rapid response to critical incidents
- Seamless integration with existing systems (e.g. firewalls)
- Proactive threat intelligence and darknet monitoring
- Scalable – from startups to enterprise environments
- Transparent costs per endpoint

Cybersecurity – made in Germany

agilimo is a certified specialist for high-security IT infrastructures and has received multiple awards as a top innovator in the German SME sector. Our SOC team combines cutting-edge detection technology with human expertise – and develops tailored, multi-layered security concepts based on the cyber kill chain.
