

New Industrial Edge Solutions at Embedded World

BRESSNER Technology GmbH presents pioneering embedded and rugged AI solutions at Embedded World 2025 in the Nuremberg Exhibition Center

Groebenzell – February 27, 2025 – BRESSNER Technology GmbH, a leading system integrator, manufacturer, and value-added distributor of industrial hardware solutions, will be exhibiting at Embedded World in Nuremberg from March 11 to 13, 2025. Visitors can explore a comprehensive portfolio of innovative products and systems in the field of industrial embedded hardware and rugged AI systems.

At the Nuremberg Exhibition Center, Hall 1, Booth 236, BRESSNER will showcase:

- **Industrial Edge Panel PCs** – The world's first models certified for the Siemens Industrial Edge Ecosystem
- **NVIDIA® Jetson Orin Edge Computers** – Brand-new compact edge platforms for demanding AI applications
- **6U PCIe Expansion** – A massive PCIe expansion system with up to 36 slots, allowing the installation of up to 16 double-width graphics cards
- **New SCORPION Models** – Including the powerful **SCORPION 12 PRO** and **SCORPION 6X V2**

As an integrated solutions provider, BRESSNER offers tailored solutions for machine automation, logistics & transportation, and production – complemented by comprehensive services in AI applications, machine/deep learning, networks, intelligent retail, communication, and security. With its headquarters in Germany and its parent company, One Stop Systems, based in the USA, BRESSNER is optimally positioned to meet the growing demands of industrial environments.

Visit us at **Embedded World 2025** to experience our innovative technologies firsthand.

About BRESSNER Technology GmbH

As a system integrator, manufacturer, value-added distributor, and provider for industrial hardware solutions, components, accessories, and built-to-order solutions, BRESSNER offers a comprehensive portfolio for a wide range of industrial applications. The company's service spectrum includes customized solutions for machine automation, logistics & transportation, and production, as well as extensive services related to AI applications, machine/deep learning, networks, intelligent retail, communication, and security. BRESSNER is headquartered in Germany, while its parent company, One Stop Systems, is based in the USA.
