

Founded in 2007, Farrleey Filtration Co.,Ltd. is headquartered in Guangzhou, with a production base in Qingyuan, a marketing center in Shanghai, and branch service offices in major industrial clusters across China.

The company is recognized as a **National “Little Giant” Enterprise**, a **National High-Tech Enterprise**, and holds **ISO certifications for quality, environment, and safety**. Farrleey is the **first drafting unit** of both the group standard and the industry standard for pleated filter cartridges. Its products have been listed in the Catalogue of Major Environmental Protection Technologies and Equipment Encouraged by the State (2020 Edition), the Catalogue of National Advanced Pollution Prevention and Control Technologies (2021 Edition), and the Catalogue of Recommended Energy-Saving Technologies and Equipment in Industry and Information Technology (2022 Edition) issued by the Ministry of Industry and Information Technology (MIIT). The company has been awarded the **“Innovation Light” Outstanding Achievement Award for SME Technological Innovation**, the **China Energy Conservation Association’s Energy Conservation and Emission Reduction Science & Technology Progress Award** in both 2023 and 2024, and the **Science & Technology Progress Award** of the China National Textile and Apparel Council in 2024. Farrleey is also a governing or member unit of professional associations such as the **China Association of Environmental Protection Industry**, Metallurgical Committee, Dust Removal Committee, **Chinese Society for Metals**, and **Chinese Society for Environmental Sciences**.

For over a decade, the company has been dedicated to the R&D, manufacturing, sales, installation, and after-sales service of filter cartridges, filter plates, filter bags, dust removal equipment, and online monitoring systems for environmental dust control. Farrleey holds **5 international patents**, **8 national invention patents**, and **over 50 utility model patents**.

With a large-scale fully automated production line, the company achieves an **annual output of up to 1.5 million filter cartridges**, and can customize various specifications according to customer requirements. Backed by a professional technical service team, Farrleey provides one-stop dust collection system inspection and evaluation services, delivering economical, efficient, and stable solutions for new construction, retrofitting, upgrading, replacement, and maintenance of dust removal systems.
