LITHOTHERAPY FOR DOGS

At Joy Dog Cat, we craft stylish semi-precious stone collars designed to bring your pets the natural healing energy of gemstones.

Laurence Ballesteros is an artist and jewelry designer with a deep passion for gemstones. From an early age, she was drawn to the therapeutic powers of stones—used since ancient times for their healing properties.

Animals have always been part of Laurence's life. Ever since childhood, she loved and cared for her pets as true family members. After creating gemstone jewelry to help her close friends with minor ailments, she had the idea to design a special collar for her beloved dog, who had become anxious following an accident. The calming effect was immediate—and over time, he rediscovered his joyful and peaceful nature.

The collar quickly caught the attention of fellow pet lovers. Not only did they admire its beauty, but many were also searching for natural ways to support their pets' well-being. This inspired Laurence to study crystal healing and launch her own brand of gemstone jewelry for animals. That's how Joy Dog Cat was born.

All collars are handcrafted in our workshop in Avignon, France.

For any questions or custom requests, feel free to contact Laurence by email or phone.

ANTI-TICKS COLLAR

BYE'TIC – THE NATURAL TICK-REPELLENT COLLAR 100% NATURAL

Protect your dog the natural way with Bye'tic, the all-natural collar that keeps ticks away—without chemicals or compromise.

SANDALWOOD BEADS – Release a pleasant, natural scent that helps repel ticks.

EM CERAMIC BEADS – Emit subtle vibrations that disrupt tick receptors, making your dog less attractive to parasites.

LAVA STONES – Add a few drops of lavender essential oil (included or recommended) to enhance tick protection and calm your dog with aromatherapy.

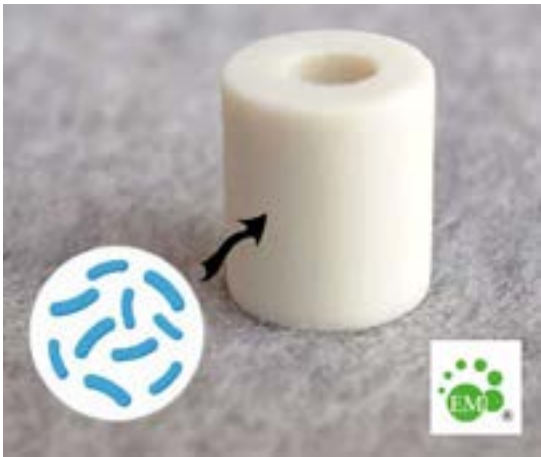

BENEFITS:

Eco-friendly and reusable

Handmade in France

Stylish and functional

Reapply a drop of lavender oil to the lava stones every 5–7 days for optimal protection.

CÉRAMIQUE EM

EM ceramic is made from clay enriched with Effective Microorganisms (EM) and fired in an anaerobic environment (without exposure to air).

These microorganisms emit magnetic resonances—subtle vibrations that interfere with a tick's sensory receptors. As a result, the tick becomes disoriented and doesn't latch onto your dog.

SANDALWOOD

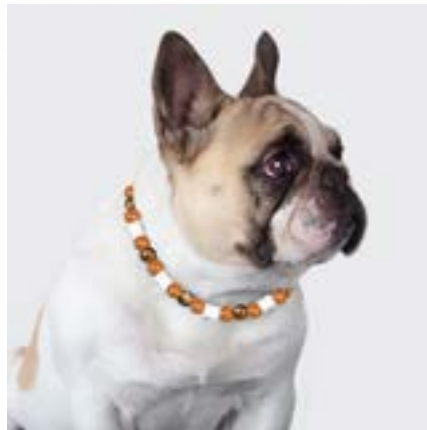

Sandalwood naturally releases a warm, woody scent that repels ticks while calming your dog.

Its gentle aroma creates a soothing, protective barrier—without any chemicals.

LAVA STONE

Thanks to its porous surface, lava stone can absorb a drop of lavender essential oil—naturally repelling ticks and fleas while offering a calming effect for your dog.
