

Robust & reliable door/gate opening

Flexible and robust radio control systems in a small format

- Encrypted authentication for increased security
- PIN code for display receiver
- Group ID increases the flexibility and simplifies the maintenance on large installations (L99)
- Waterproof design on transmitter (IP67) and receiver (IP65)
- Duplex (two-way radio) which enables a relay feedback indicator on the transmitter
- Opens up to 999 doors
- Very fast function response time
- Complete range of transmitters in a modern and ergonomic design
- Shock-resistant and user friendly
- Highly durable long-life push buttons, over 1000000 cycles momentary
- Configuration tool simplifies installation of large-scale gate/door installations
