# About Telink

---

Telink Semiconductor is a global fabless IC design company with offices and subsidiaries covering North America, EMEA, and Asia-Pacific.

Telink is dedicated to the development of highly integrated low-power multi-protocol radio frequency system chips and comprehensive protocol stacks for Internet of Things (IoT) applications.

Telink's product portfolio is aimed at serving markets ranging from smart home to location services to consumer electronics and currently includes 2.4GHz RF SoCs and SDKs for Bluetooth® Classic & LE, Bluetooth Mesh, Zigbee, Wi-Fi, Apple HomeKit, Apple FMN Accessory, 6LoWPAN/ Thread, Matter, and proprietary protocols.

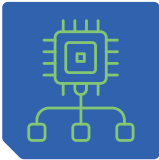

-  Sales and Technical Support
-  Research and Development
-  Sales and Technical Support + Research and Development

# Enabling IoT Ecosystem

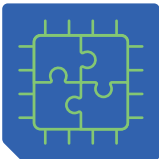

# Diversified Product Portfolio

## Multi-Protocol IoT SoC

Supports multiple standard protocols with a single SoC

## 2.4GHz Proprietary SoC

Supports proprietary protocol for cost sensitive or customized applications

2.4GHz 

## Wireless Audio SoC

Support Bluetooth (Classic and LE) as well as proprietary audio technologies

# Applications

## Smart Home

## Remote Controls

## Wireless Audio

## Human Interface Devices

## Wearables

## Electronic Shelf Labels

## Location Services

## Wireless Gaming

## Health and Wellness

## Automotive
