Attic BOUNCER

Microsoft 365 protection against fake login pages and suspicious login attempts

Hackers do not break in, they simply log in!

Cybercriminals use two methods to access your Microsoft 365 account. First, through fake login pages that are indistinguishable from the real ones. If you log in there, they intercept all your credentials including two-factor authentication. Second, by simply trying: they test stolen passwords from previous data breaches, common combinations, or systematically attempt until they succeed.

![Microsoft 365 logo] **Microsoft 365**

A strong password and two-factor authentication do NOT protect against login fraud.

Once cybercriminals are logged in, they can quickly cause enormous financial and reputational damage.

🚨 Customers receive fake invoices "from you"
🚨 You start spamming emails to external contacts
🚨 Data gets stolen and then the extortion starts
🚨 Your reputation is destroyed

Fortunately, this does not have to happen if your login security is in order.

Stop hackers at the front door!

Attic BOUNCER recognizes fake login pages and immediately raises the alarm when you land on such a phishing page. You will see a large red warning screen, so you know to leave immediately.

In addition, BOUNCER also protects you against login attempts by hackers by automatically monitoring who logs in, how often, and from which location. If we see irregularities, we report them immediately so that you can block the account yourself.

ATTIC
fix your digital security
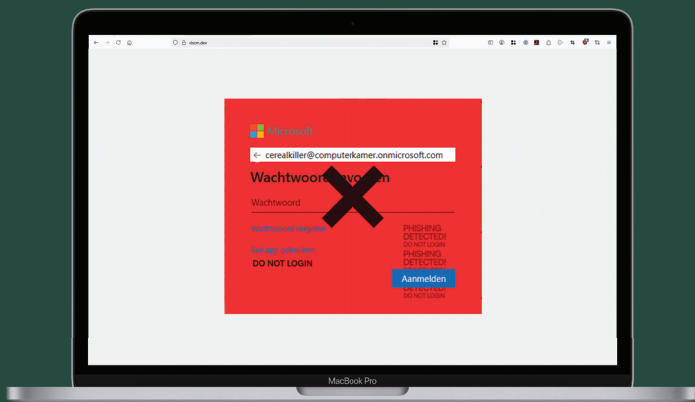

What protection is included in Attic BOUNCER?

Protection against phishing
✅ Real-time detection of fake Microsoft 365 login pages
✅ Warning with red alert screen on fake pages
✅ Authenticity seal on official Microsoft 365 login pages
✅ Email notification to the administrator when a colleague visits a fake page
✅ Insight into which colleague visited a fake login page

Protection against login attempts by hackers
✅ Monitoring of all Microsoft 365 login activities
✅ Detection of suspicious login attempts (who, where, how often)
✅ Email notification to the administrator about suspicious login activities

Online security awareness training
✅ Focused on recognizing risks

€ 30 /month
Incl. 20 users, +€1 per extra user

Cybersecurity made in Europe
Data protection, regulatory compliance, and cultural alignment.

Affordable security through automation:
Efficiency and scale without high costs.

Attic LAB
Developed by hackers and engineers, focused on automation and research.

Focused on Microsoft 365
Maximum protection for the platform agiinst (BEC, data leaks, extortion).

Who is Attic BOUNCER suitable for?

- SMEs with a Microsoft 365 environment
- SMEs without their own IT department
- SMEs concerned about hackers, phishing, payment fraud, and ransomware
- SMEs wanting insight into who logs in when
- SMEs that want to detect suspicious login attempts

WE ARE
ATTIC SECURITY

A product-driven security company for SMEs. Founded by hackers and engineers.

We are rewriting the rules of cybersecurity operations. No jargon, no clutter, just smart and scalable protection where it is needed most.
