

Company and products

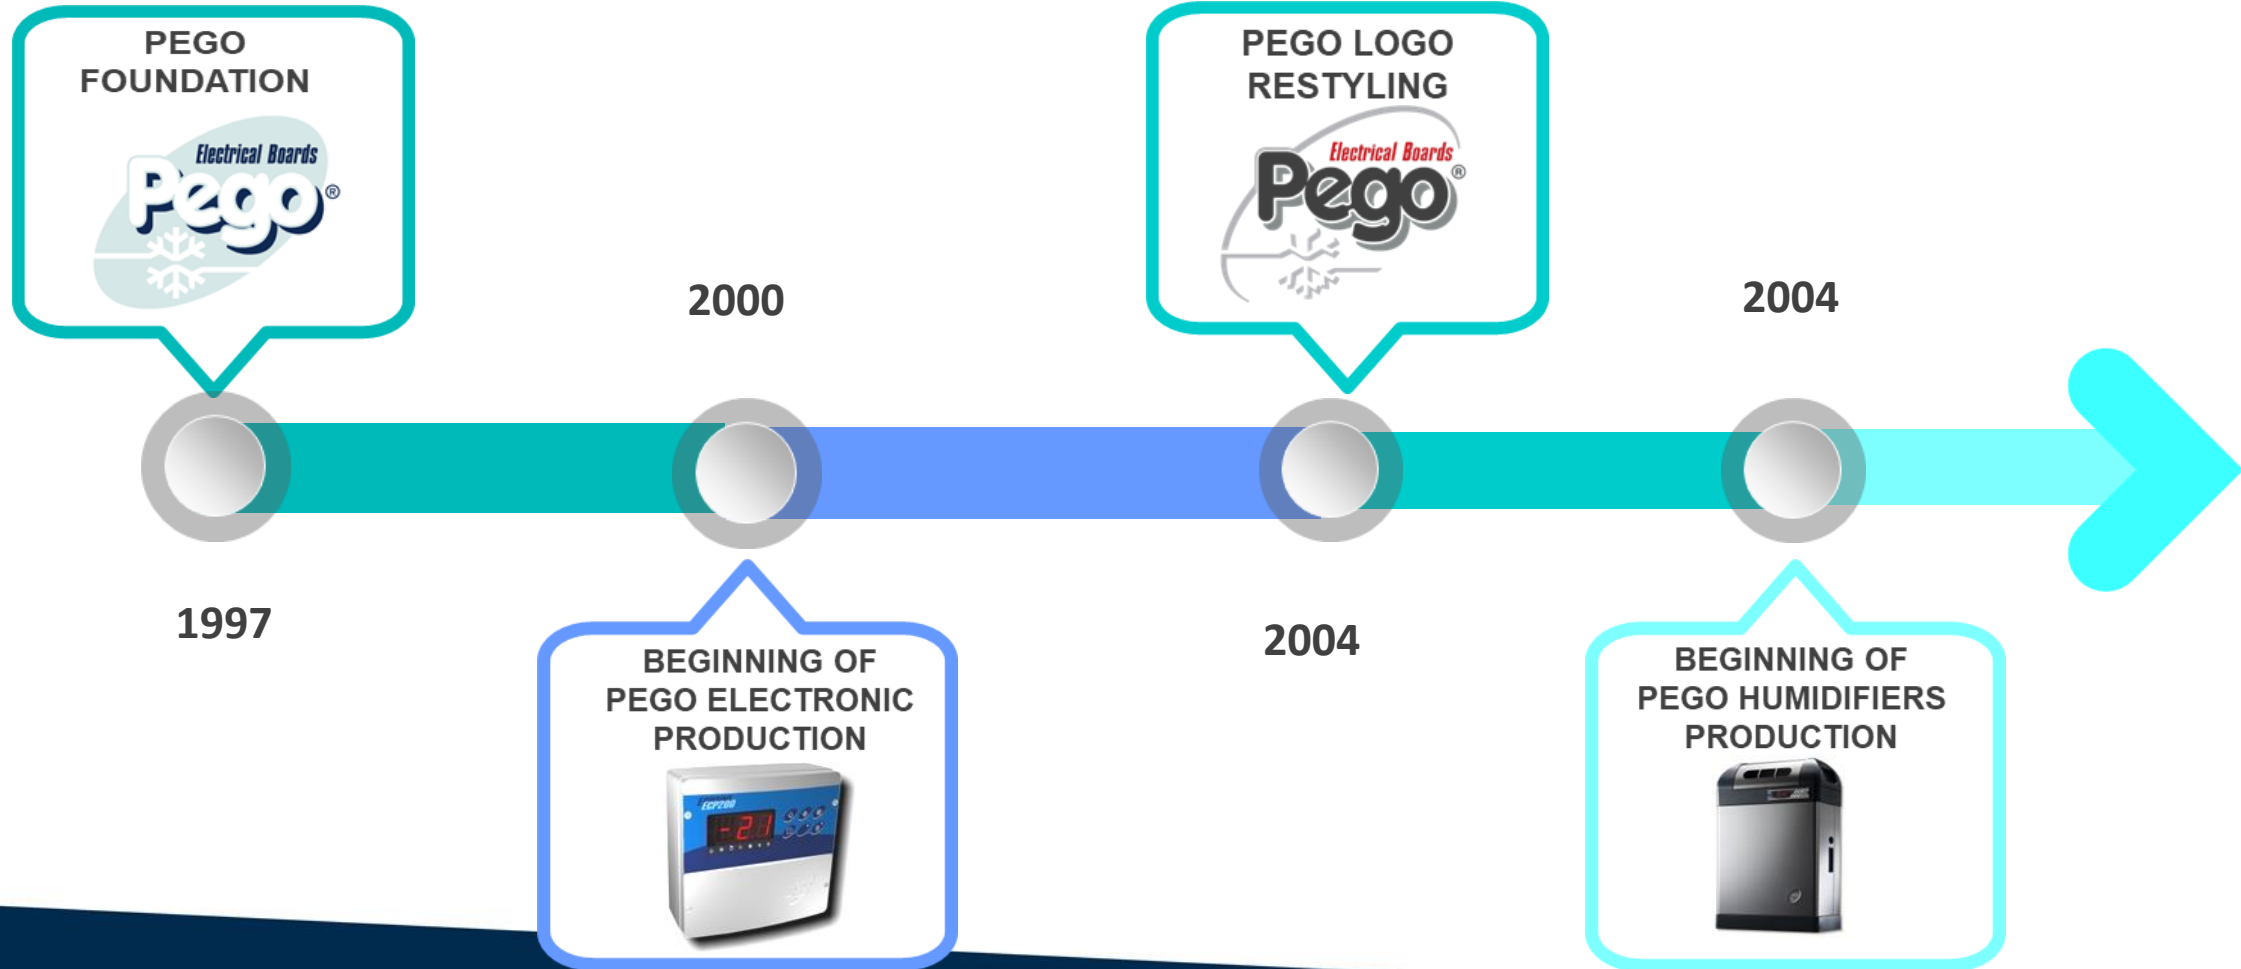

PEGO COMPANY

Pego was **founded on 1997** as manufacturing company of panels for refrigeration. Over the years it has reached a **leading position** in production of **electrical panels and electronic controls for commercial and industrial refrigeration and air conditioning** and also in the **steam humidifiers** production. Affirmed on the national market, with always cutting-edge solutions, Pego expanded then on European and international level, supported by an efficient net of distributors. Pego is also recognized for its **strong focus on customer needs and excellent pre and after-sales service**.

Products overview

Standard panels

Electrical panels and electronic controls for commercial and industrial refrigeration and air conditioning

Humidifiers

Immersed electrodes steam humidifiers available in different series and sizes

Special panels

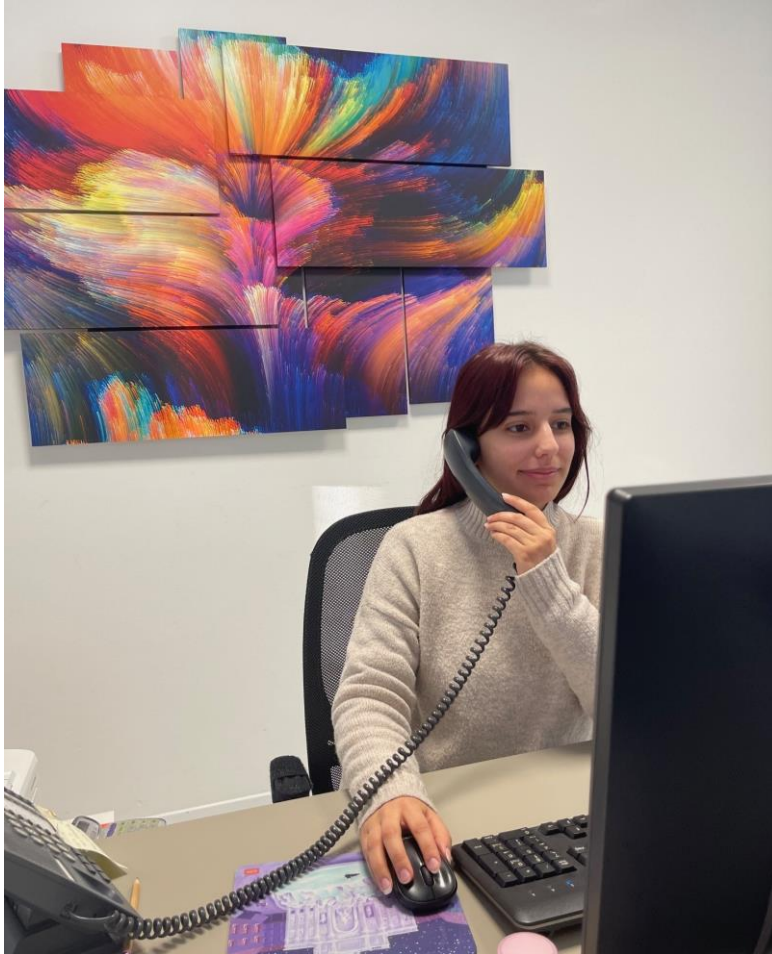

Design and assembly of special panels according to the relative specifications for particular requests.

Pre-sales consultancy and quotation services in order to always find the appropriate solution for the specific application requested.

Panels are designed with latest generation CAD systems, according to the requested specifications, creating the wiring diagram and supporting documentation in compliance with the Standards.

After-sales service

One of PEGO's strengths is the constant telephone technical assistance provided, not only to distributors and manufacturers but also directly to installers for all application problems that may be encountered in the field.

PEGO's goal is to design and manufacture increasingly technologically advanced and reliable products to fully satisfy its customers.
