

**we create for
all who protect us**

A close-up, profile view of a police officer in tactical gear. The officer is wearing a black helmet with a blue RAC (Riot Attenuation Cap) and a black balaclava. They are holding a black rifle. On their left wrist, they wear a MoG (Masters of Gloves) branded watch and a MoG branded wristband. A "POLICE" patch is visible on their uniform. The background is blurred, showing an outdoor setting.

About Masters of Gloves

Masters of Gloves is a young, dynamic and dedicated company active in the development of gloves for users who consider quality, safety and comfort extremely important. With our brand **MoG**, we create customized gloves for armed forces, law enforcement, fire brigades and rescue teams. Our mission is to create gloves for those who protect civilians in everyday, dangerous or even life-threatening circumstances.

Organisation

Office Belgium

- Product development
- Sales team & business development
- Customer support
- Warehousing

Office Netherlands

- Invoicing
- Finance

Originally started in **2017** as a solutions provider with tailor-made production for tenders and projects, Masters of Gloves has been very active in exploring current needs in the field within the LEAF market. This has led to the introduction of the **MoG** brand within the professional tactical sector with a particular focus on comfort, performance and innovation.

Since 2020, Masters of Gloves is associated with **Guide Gloves**, one of the leading European specialists in hand protection.

Guide Gloves, including Masters of Gloves, make part of the Safety Technology within the **Bergman & Beving** group, a company with a turnover of around SEK 5 billion and around 1300 employees, offering a diverse range of strong niche solutions. While the main market is the Nordics, B&B has a presence in over 5000 sales outlets and distributors across 25 countries.

“ All products are tested, developed
and approved by real end-users

- Masters of Gloves

- Anti-riot gloves
- Roping gloves (Fast Rope / rappelling)
- Cold / water protective gloves
- Tactical diving gloves

CO-DEVELOPMENT

One of Masters of Gloves' greatest strengths is that we also develop to measure. Based on the predefined criteria, we start designing and prototyping, to achieve the desired results step by step. All this is accompanied by extensive field testing by professional units.

About our gloves

We are and think different, for sure. We're steering at a new revolution in tactical gloves. We develop all gloves with people who operate within defense, law enforcement or rescuing, and translate their needs into a glove. This is the only way to develop gloves that meet the highest standards. That's the reason why we are a fond believer of co-creation, design thinking and cross-innovation.

How we work

Product & supply management

Production

- Nominated supplier network with experienced and certified manufacturers (ISO 9001 and related)
- Extensive workforce and production capacities
- Internal and external quality control processes installed and monitored
