CO₂ Mini Booster **carbo-Line**

The **carbo-Line** series is perfectly suited to the requirements in small food markets.

carbo-Line uses the environmentally friendly refrigerant CO₂ with a GWP of 1. All cooling requirements can be met safely, efficiently and in compliance with all the applicable standards and laws.

carbo-Line saves a lot of space.

carbo-Line is a complete plug-and-play system incl. control system and equipment as required.

carbo-Line configurator: Soon configurable in the browser and on mobile devices under www.compact-kaeltetechnik.de

Usage:

- ✓ Bakery
- ✓ Butcher
- ✓ Small grocery stores
- ✓ Fruit and vegetable shops
- ✓ Organic shops
