

Press release

IT Security Award 2025: Apply now and demonstrate your innovative strength

Deadline: August 31, 2025

Otterfing, August 20, 2025. Have you developed an outstanding IT security solution that provides companies with lasting protection? Then secure your chance to win the IT Security Award 2025 – one of the most prestigious awards in the German-speaking IT security sector!

The award recognizes top solutions in four core areas

The IT Security Award 2025 honours outstanding projects, products, and solutions that create real added value for corporate security. We are looking for innovations in the following categories:

Management Security: Benchmarking tools, vulnerability management, risk management platforms, policy management systems, innovative certification approaches, standardization solutions, security architectures, compliance frameworks, and anomaly detection

Internet/Web Security: Cybersecurity platforms, threat intelligence solutions, modern encryption technologies, SIEM systems, IDS/IPS solutions, UTM appliances, and protection against viruses, spam, and spyware

Identity & Access Management: Customer Identity & Access Management (cIAM), API management solutions, DevOps security integration, ABAC frameworks, blockchain-based identity solutions, single sign-on systems, provisioning tools, and federated identity concepts

Cloud security: Cloud Access Security Broker (CASB), cloud security strategies, specialized cloud services, process optimization for cloud environments, and orchestration of security services

Why it's worth applying

Winners of the IT Security Award benefit from maximum visibility in the IT security community. The award brings:

- High media presence and coverage
- Seal of quality with appeal in the DACH region
- Strengthening of market position and credibility

Award ceremony at it-sa 2025

The award ceremony will take place on October 7, 2025, as part of the leading IT security trade fair it-sa in Nuremberg. Starting at 3:30 p.m. in Forum E (Hall 9), this year's winners will be honored in front of a high-caliber audience of experts.

Who can participate?

The IT Security Award is open to all innovators – from established market leaders to up-and-coming start-ups. The decisive factors are:

- Innovation: New approaches and technologies
- Practical relevance: Real benefits for user companies
- Impact: Measurable improvement in the security situation

Whether you are a software manufacturer, consulting firm, system integrator, or tech start-up, any provider of innovative security solutions can apply for this coveted award.

Apply now – time is running out!

The application deadline is August 31, 2025. Take this opportunity to demonstrate your innovative strength and position yourself as a pioneer in IT security.

Application and further information:
