From barbecue to versatile outdoor kitchen

bogason Quasar outdoor kitchen in RAL 7021 - black-grey

Experience the kitchen

Welcome to bogason

Experience perfection outdoors with the Quasar Grill from bogason

Welcome to bogason, your reliable partner for professional, high-quality barbecues and outdoor kitchens! Since our foundation, it has been our passion to offer barbecue enthusiasts an unrivalled outdoor experience - characterised by quality, innovation and first-class design.

Our claim: Highest quality in every detail

At bogason, we believe in the fusion of form and function. Each of our products is manufactured with the utmost precision and care to not only be aesthetically pleasing, but also to fulfil the highest performance standards. Our products are the result of years of experience to guarantee you the best possible grill results.

Quality that convinces

Our barbecues are made from premium materials that ensure durability and resistance to the elements. From stainless steel to innovative heat distribution systems, we focus on quality you can rely on for every barbecue adventure.

Customer satisfaction takes centre

Our commitment to customer satisfaction is reflected not only in our products, but also in our service. The bogason team and its partners are at your side with expertise and support from the very first consultation.

Wide range of possible combinations:
Rotisserie - grill grates - teppanyaki plate - warming areas

Innovative design for real barbecue enthusiasts

A Quasar barbecue is not just a cooking appliance, but a statement for passionate barbecue fans. With innovative design and sophisticated features, our barbecues offer a unique blend of style and practicality. Whether you are an experienced barbecue master or a novice, bogason makes barbecuing with a Quasar an unforgettable experience.

Impressions

From barbecue to versatile outdoor kitchen

Discover the limitless possibilities of a customisable outdoor kitchen! With our versatile modules, you can design your kitchen entirely according to your wishes and needs. Each individual module can be seamlessly combined with others, allowing you to create a unique outdoor kitchen configuration that fits perfectly into any environment. These modules are not only available for fixed installation with the gas barbecue, but can also be set up as stand-alone units. Discover the freedom to customise your outdoor kitchen and experience unforgettable outdoor culinary adventures!

An eye-catcher in colour too -
the bogason Quasar

Give your outdoor area a personalised touch with a bogason QUASAR and make a stylish statement. In addition to carefully selected grey and black tones, the Quasar is also available in RAL 9016 traffic white and RAL 3005 wine red as standard options. Show off your variety of colours and bring a trendy aesthetic to your outdoor environment with your individually configured Quasar.

Individual design options - kitchen block

With the bogason kitchen block, you can create your own personalised cooking island in your garden. The design options for this kitchen shape are as unique as you are. Let your imagination run wild. (Almost) anything is possible.

Individual design options - two lines

Plan your kitchen in two rows to create short distances and bring your different cooking options close together.

bogason Quasar outdoor kitchen in RAL 7044 - silk grey - ceramic worktops 12mm - two-tier construction with bogason wok burner, front socket

Customised design options - L-kitchen

Make the most of your space! With this L-shaped kitchen, you can combine three different cooking and grilling options and have a spacious worktop for your preparations and later serving.

bogason Quasar outdoor kitchen in RAL 9016 - traffic white - ceramic worktops 20mm - kitchen with fully integrated bogason wok burner, electric teppanyaki, refrigerator, retractable socket in the worktop

Individual design options - Solitaire!

Thanks to the modular design, all bogason products can also be set up as stand-alone units, offering further design options for your outdoor area.

bogason Quasar - modular! In RAL 3005 - wine red

The small balcony or patio kitchen - without a gas barbecue

This small outdoor kitchen combines the features of cooking, cooling and washing up in a minimum of space. Ideal for your balcony or terrace. Available in depths of 55 cm or 70 cm - with a stainless steel worktop or high-quality ceramic worktop - it fits into even the smallest niche.

A real highlight for your home.

This kitchen can also be combined with our high-performance wok burner.

Cool colours for stainless steel

You can choose from four different standard colours in a fine-textured matt finish.

You can choose between black or white for the thermometer colour of your grill and design your Quasar exactly as you want it.

We always manufacture your modules in the same colour.

Other RAL colours are available on request

Choose your favourite colour to match your garden furniture, your fence or whatever you like.

Also beautiful to look at from behind

The rear panels of the grill and the modules are just as attractive as the front. No visible ventilation slits, no unnecessary holes. This means you can position everything freely in the room as you wish and enjoy your kitchen from all sides.

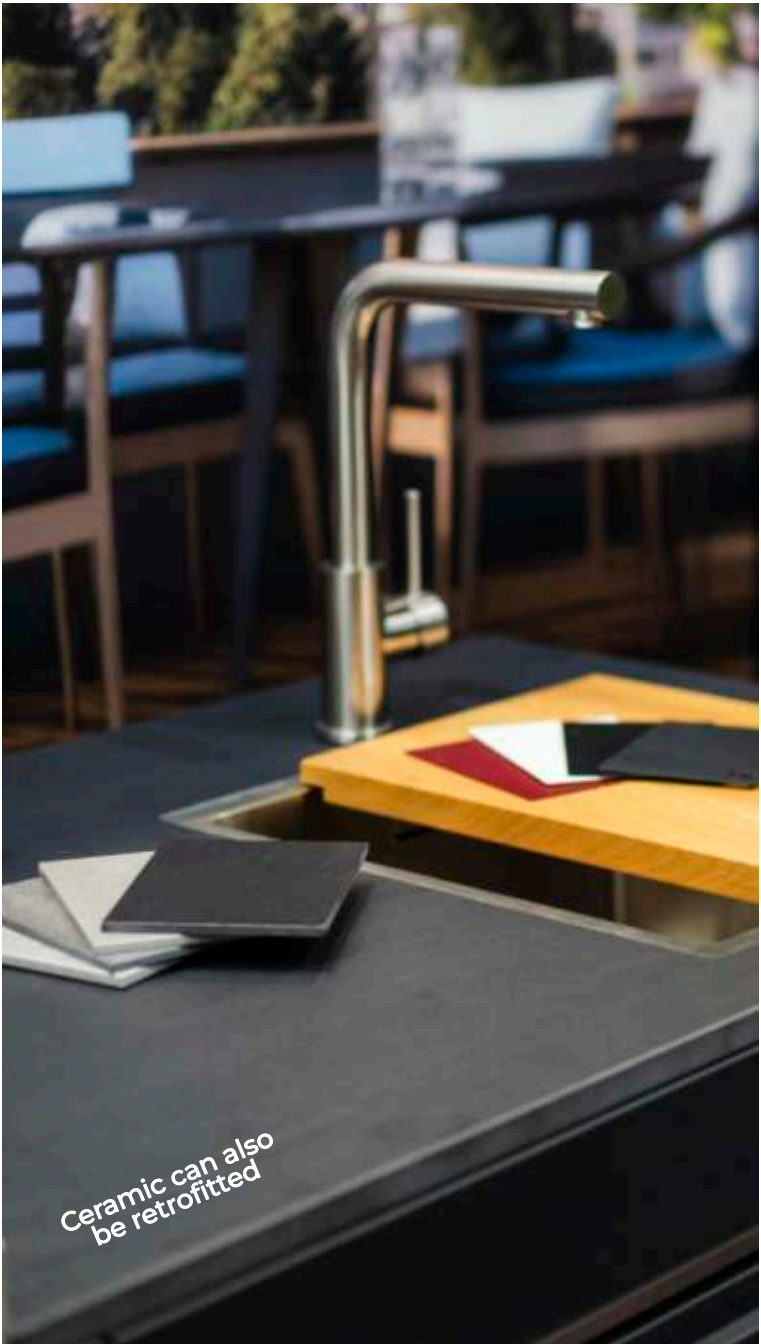

Ceramic alternatives to stainless steel worktops

Would you like to give your kitchen an even more individual look? Our ceramic worktops will turn your kitchen into something very special. The stainless steel worktop is replaced by a ceramic worktop.

Robust, scratch-resistant, durable, unique. Your bogason dealer can provide you with further information on colours, designs and retrofitting.

bogason Quasar - Kitchen unit in RAL 7044 - silk grey -
Details: Sink with stainless steel tap and 3-part waste separation system

Ceramic can also be retrofitted

bogason outdoor kitchens - Dining area and counter solutions

With bogason grills and modules, you too can create your dream outdoor kitchen. There are almost no limits. All your wishes can be fulfilled, including an integrated dining area.

From barbecue to versatile outdoor kitchen

bogason Quasar Grill - What makes the Quasar special?

The bogason gas barbecues have some unique details that you will only find at bogason. Unique details that make using your Quasar easy and convenient at all times.

Impressive variability

Impress your guests with this versatility! If you have a grill grid, a rotisserie and a teppanyaki plate at the same time and can prepare a wide variety of dishes in one go, then you have definitely decided in favour of a bogason Quasar. You also don't have to decide whether you want to use your rotisserie or your side shelf. With bogason, you can do both at the same time.

Safe barbecuing with the bogason Quasar

Each burner of the Bogason Quasar is equipped with a flame monitoring system. For you, this means that if a burner goes out for any reason, the gas supply is automatically interrupted - a crucial safety mechanism that guarantees your safety.

Temperature in a nutshell

Thanks to the built-in capillary thermometer in the control panel and the perfect positioning of the temperature sensor under the grill rack on which the food is placed, you get precise temperature readings. It is therefore up to you to set the exact temperature you want on the Quasar using the easy-to-operate controls on the front. These settings can be repeated at any time thanks to the scale.

"Sizzle" - The hot spring with up to 800°C!

Welcome to the world of "Sizzle", where grilling reaches a new dimension. Our 800°C "Sizzle Area" is the ultimate place for preparing steaks and anything that requires intense heat for a short time. But that's not all - vegetables also become a culinary experience here. You can cook them at a low temperature in a pan on the grid or on our optional teppanyaki plate. There are no limits to your culinary imagination.

Organisation made easy

The well-designed base cabinet enables optimum organisation and storage of accessories. With its clever system, everything is easy to organise. This means that the grill master always has an overview and all accessories are quickly to hand. The high-quality finish of the base cabinet not only blends in aesthetically with the overall design, but also makes sorting in and out an effortless pleasure. The bogason Quasar grill sets new standards here.

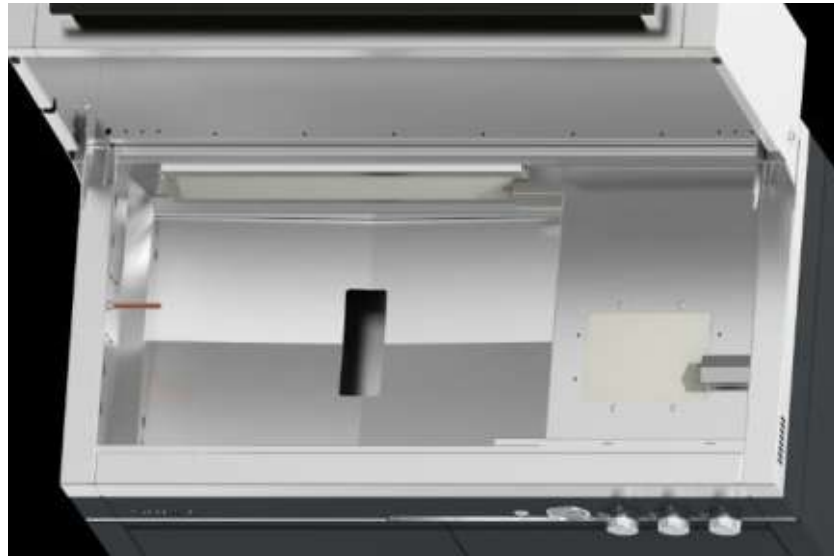

Solid and yet easy to move

The imposing lid of the Quasar weighs an impressive 17 kilograms. That's why we have made sure that you can open it effortlessly and safely with just one hand, even in hectic moments. Precisely mounted and equipped with a spring balancer, handling is always smooth and comfortable. (utility model protected)

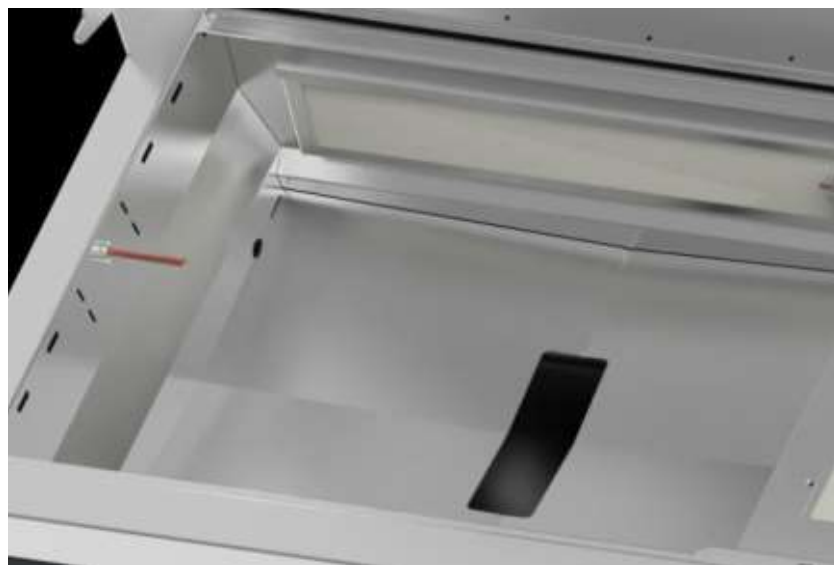

bogason Quasar Grill - Particularly easy cleaning included

The innovative grill structure in the interior enables you to clean the appliance easily and efficiently in the shortest possible time.

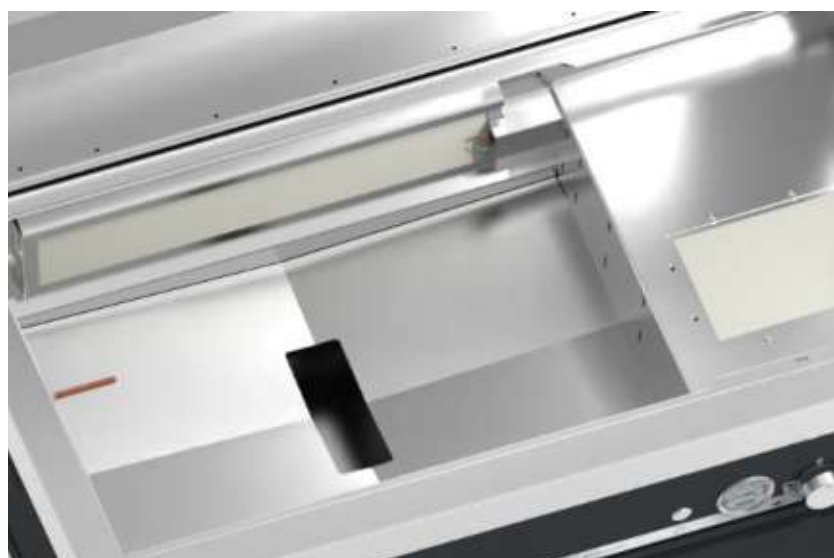

Smooth interior surfaces

Cleaning the Quasar is absolutely unproblematic. All surfaces are smooth so that deposits can be easily removed with a spatula. If you want more, you can also use standard oven cleaner and a dishwashing brush for cleaning.

No joints, no hidden corners

Barbecue juices, grease and liquids can simply drip down and collect in the tray below the grease drip trays. Small incrustations can be easily removed with a spatula. The main burners are shielded so that nothing needs to be dismantled to clean hidden corners. It couldn't be simpler.

Removable base plates

If you still want to clean the grease drip trays in your dishwasher, you can simply remove them from the top. These trays are no bigger than a pizza plate and fit in any dishwasher.

bogason Quasar Grill - Technical data

Product information "Quasar gas barbecue with base cabinet"

With the bogason Quasar gas barbecue including base cabinet, you can experience the fascination of the finest outdoor cooking experiences in the open air. Made from high-quality stainless steel, it is not only a technological masterpiece, but also the key to unforgettable barbecue moments.

The single-colour powder coating with a fine textured matt finish is available in four different colours. You also have the option of choosing the colour of the thermometer and designing the Quasar exactly as you want it. Other RAL colours are also available on request.

The main grilling surface of the Quasar has two high-performance burners with a total heat output of 12 kW and a large, indirect grilling surface of 2835 cm². This surface enables both gentle indirect grilling in the centre and powerful, direct grilling at the front and rear edges for the perfect finish to your dishes.

The 800°C sizzle area with a heat load of 3.5 kW is perfect for grilling steaks and other dishes that require very high heat for a short time. You can also prepare vegetables to your liking in a pan on the grid or on the optional Teppanyaki plate - there are no limits to your imagination.

The innovative interior of the Quasar gas barbecue offers powerful technology and opens up completely new dimensions in barbecuing, cooking and savouring. Features include a spring-loaded, double-walled lid with lacquered wooden handle strip, four 8 mm thick stainless steel grids, a capillary thermometer for precise temperature measurement, a grease drip tray and a base cabinet with two hinged doors and a concealed drawer.

Equipment features Grill Quasar:

The innovative interior with powerful technology opens up completely new dimensions for grilling, cooking and savouring:

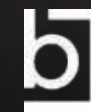

- Spring-loaded, double-walled lid with 3 compartments lacquered wooden handle strip
- 4 stainless steel grids (8 mm bars): 3 pieces 204 mm wide, 1 piece 312 mm wide
- 2 warming grids, divided, with centre support
- Capillary thermometer for exact reading of the temperature below the grill level, colour black or white
- Removable grease drip tray
- Main grilling surface: 2835 cm² (630 x 450 mm) with 2 burners 6kW each
- Sizzle area grilling surface: 240 cm² (182 x 132 mm) 1 burner a 3.5kW

Quasar drawer base unit:

- 2 hinged doors with soft-close hinges
- Concealed drawer, 400mm extendable to on ball bearing telescopic rails
- 2 swivel castors with ball bearings on the left lockable one rigid axle on the right
- Pull handle on the left
- Storage space for all accessories
- Space for an 11 kg propane cylinder

Dimensions and weight:

- Grill dimensions (W x H x D): 1050 x 1172 x 550 mm
- Height with lid open: 1590 mm
- Working height: 960 mm
- Weight: approx. 110 kg

bogason drawer insert Gastro-Norm trays

bogason Quasar operating cockpit with thermometer in black, solid stainless steel control knob

All bogason modules are designed to match the bogason Quasar, but can also be assembled as individual components or as a kitchen block. The modules are powder-coated all round in a fine-textured matt finish. Each

module has a stainless steel worktop as standard. Ceramic worktops - also available in one piece - are available as an option.

The cabinet module - perfect storage space for your outdoor kitchen

The cupboard module offers the ideal solution for perfect storage space in your outdoor kitchen. Equipped with a practical shelf and height-adjustable feet, this module can be flexibly adapted to your needs. Enjoy organisation and tidiness in your outdoor cooking environment.

The sink module - a perfect addition to your outdoor kitchen

The sink module is the ideal addition to your outdoor kitchen. With a particularly practical designer stainless steel sink mixer tap, it scores with its clever functionality. The tap can be easily swivelled to the side to create more space, which is particularly practical. With this module, washing up outdoors is not only efficient, but also stylish - experience the convenience and elegance of the sink solution in your customised outdoor kitchen. Can also be combined with a hot water under-sink unit if required.

The drawer module - quick and efficient for your outdoor kitchen

The drawer module is the ideal solution for spontaneous tasks in your outdoor kitchen. The module has a spacious drawer, two pull-outs and height-adjustable feet. Combined with a cutlery tray, you can experience the ease and efficiency that the drawer module brings to your outdoor cooking routine. Enjoy the practical organisation for every outdoor culinary venture.

The Kamado module - the fusion of tradition and modularity

Discover our Kamado module - the perfect addition to your outdoor kitchen! This innovative module offers a special inlet that allows you to seamlessly integrate a kamado grill. Customise your outdoor kitchen by adding the unique warmth and versatility of a Kamado grill to your modular setup. Experience the fusion of tradition and modularity for a barbecue experience in a class of its own!

The refrigerator module for perfectly chilled drinks and food

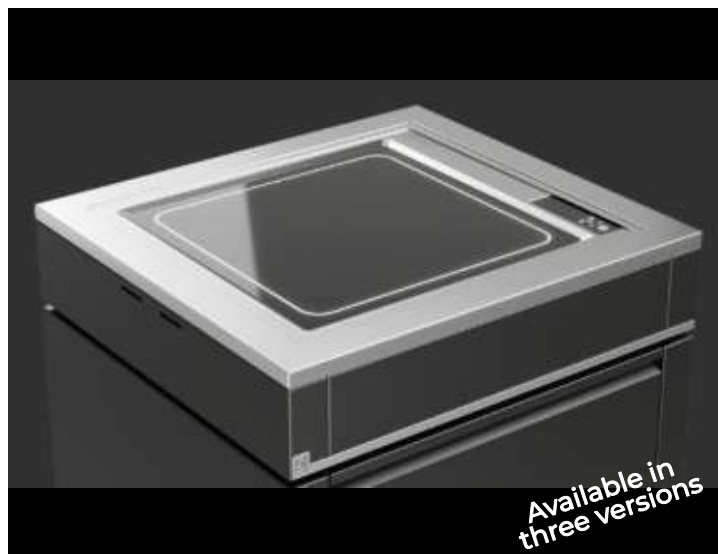

With the refrigerator module, the optimum temperature is always maintained when grilling, thanks to 63 litre capacity, both drinks and food are kept in the perfect climate. The integrated LED interior lighting ensures that you can easily find everything you need, even in the late hours.

**bogason Quasar -
the outdoor kitchen for your barbecue
experience in a class of its own**

bogason modules - Everything from a single mould

Experience more barbecue and cooking options for endless enjoyment!

Module supplement electric teppanyaki grill

Would you like an additional teppanyaki grilling surface on which you can prepare many dishes directly? With our fully integrated electric teppanyaki grill, you have two grilling zones with up to 380°C. Touch-controlled, this gives you the flexibility that offers you completely new possibilities. Whether you want to use the cabinet, drawer or fridge module underneath - it always fits! If you don't need your teppanyaki, the sturdy 2 mm stainless steel cover extends your work surface.

Wok burner module in the bogason edition

Wok cooking in its purest form! With our 14kW high-performance wok burner made in Germany, you can experience the classic wok heat (wok flavour) that can only be achieved through extremely high temperatures in a short time. The solid jet burner technology is completely concealed in the module and the control technology is seamlessly integrated into our Quasar grill. There is space for an 11kg gas cylinder in the lower cabinet of this module.

If you don't need your wok burner, the pan ring can be easily removed and a sturdy cover closes the open hole in the work surface.

Electric teppanyaki grill and induction hob in optical unit

Two appliances combine grill and induction in visual elegance. An electric teppanyaki with grease tray and a powerful induction hob with 2 zones including a high-quality stainless steel frame all round for additional protection. Touch-controlled and easy to clean, your outdoor kitchen offers the convenience you are used to from your indoor kitchen. Can be used in one XL module or separately on two modules. This combination adapts to your requirements.

Guarantee - Quality - bogason Quasar

We develop and produce our products exclusively in East Westphalia - handmade in Germany.

All processed metal sheets are made of stainless steel, even the colour-coated ones. That is why we are more than convinced of our quality. You benefit from this too. We give you a lifetime guarantee* on all stainless steel sheet metal parts. And a full 5-year guarantee on all functional parts and gas elements. And if something should go wrong, bogason will replace every part.

Our partners

Essperiment

Born in Aachen, Björn Bitzer began his career by training as a chef in Langewehe and then worked at the Hotel Villa Sophienhöhe in Kerpen. He was then drawn to the water: on various river cruise ships, his experiences with the international clientele and crew gave him many impressions that influenced his cuisine. This was followed by further stations on land, including the gourmet restaurant "Graf Leopold" in Daun. Since 2012, he has been incorporating all his different experiences and adventures into his "Essperiment". With him, you have the opportunity to be part of it - so that your stay becomes a unique moment of pleasure.

Gasthaus Spieker

Opposites attract and unite to create pure sensual pleasure. Mediterranean lightness and Westphalian down-to-earthness, interpreted in a modern and regional way, are the basis for the surprising creations from Franz Spieker's kitchen. After years of training and travelling in Chicago and Mallorca, the passionate chef returned to his Westphalian homeland to spoil his guests again and again. But even here, he is curious to look beyond his home turf, always on the lookout for inspiration and exciting flavour experiences.

Notes

*
Some sheet metal components of bogason products are made of chrome steel. This material can show signs of rust in very salty environments or near the coast. There is no warranty claim.
