Polypropylene sealing solutions with peel for mono-material packaging

CPPeel® lidding films are the best choice for packaging manufacturers to seal food packaging in a peelable way. CPPeel® film solutions are based on pure polypropylene and are fully recyclable. Our peel solutions can be used on different geometries and PP cups.

Applications

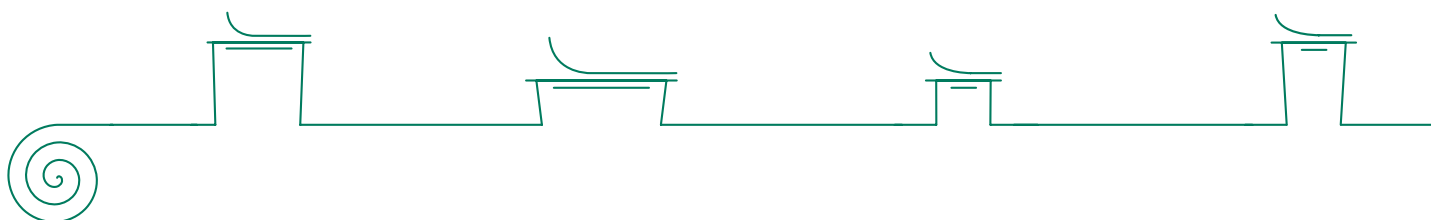

- Lids for round and square cups and trays
- Laminate with oxygen barrier
- Thermoformed snap-on lids
- 2 in 1 solution: Seal & Peel with mechanical resealability
- Profol recommends CPPeel in 100 and 250µm

Better carbon footprint

- CO₂ footprint 4 times better than aluminum*
- No solvent-based heat-sealing lacquers needed
- No embossing needed for separation - magazine ready

Benefits of PP lids on PP containers

- + Sustainable and easy to recycle
- + Interseroh-Rating Made for Recycling: very good
- + End-user friendly
- + EU Regulatory and style guide compliant
- + High puncture resistant
- + Film solutions based on recyclate possible (ISCC Plus certified)
- + Tough
- + Vibrant colors
- + Low energy required for sealing
