## EVERSWEET ULTRA

AI Camera

Personalized Health Support in Every Sip. Powered by AI.

Featuring an AI camera with pet facial recognition, this fountain tracks each pet's drinking behavior and turns it into individualized health insights, making personalized care effortless for multi-pet households. Its 5L high-capacity reservoir provides up to 15 days of flowing water for a single pet. By separating clean and waste water, the non-filtration system helps minimize contamination and maintain water hygiene. Innovative Fountain Cube modules extend hydration into daily care, transforming hydration from a basic necessity into a personalized daily wellness solution.

# SPECS

## Camera

- 1080p full HD Camera with 140° Wide View
- Infrared Night Vision
- One-way Audio
- Privacy Protection

## Dimensions

301\*294\*353 mm (11.85\* 11.57\* 13.90 in)

## Weight

3.5 kg (7.71 lbs)

## Capacity

5L (169 oz)

## App Connection

2.4GHz / 5GHz Wi-Fi

## Material(s)

ABS, 304 Stainless Steel, PP, PPO

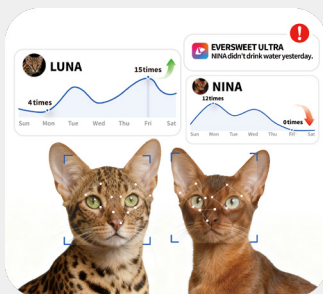

## Range of Application

Cats and Small-breed Dogs

MSRP  
 **\$199.99**

# CORE TECHNOLOGY

### AI-Powered Hydration Insights for Every Pet

With an AI camera featuring facial recognition, the fountain monitors each pet's real-time drinking activity and tracks their drinking history, enabling personalized urinary health monitoring in multi-pet homes.

### Non-Filtration Wastewater Separation System

With clean-waste water separation, used water drains into a waste tank and never returns to the reservoir—reducing contamination. Used water drains into the waste tank on schedule or with one tap in the app.

### Wellness-Boosting Smart Auto-Refill System

With a built-in water level detector, the fountain refills automatically. As it refills, a Fountain Cube module at the outlet releases care ingredients into the water, with selectable formulations such as urinary, bone, and skin & coat care.

Launch Date 2026/05
