

G.W.P. Manufacturing Services AG

cross-procedural manufacturing services
in small & medium lot sizes

Your partner along the value chain.

Engineering

Technology consulting for a wide range of materials and manufacturing processes.

Design & development
Technology consulting, CAD evaluation

Prototyping

Depending on the function of the end product and the associated process chain, we advise you on the selection of the most appropriate prototyping process.
Close-to-series production: 1 to 3,000 units

PROTO DIE, PROTO INJECT
Die casting, injection molding, precision casting
sand casting, PA casting, vacuum casting
CNC milling, SLS & SLA, deep drawing

Series Production

High quality industrial tools optimized for the product life cycle.
Lot sizes up to 25,000 units

Metal Processing

Die casting, gravity die casting, extrusion
CNC milling & turning, deep drawing

Plastics Processing

Injection molding, thermoforming
extrusion in many common plastics

Services

Consulting at all points of the value chain
Coordination of the entire production project
Assembly service, international logistics service

Surface Treatment

Vibratory grinding, blasting, powder coating
wet painting, CDC, passivation and much more.
