

We orchestrate your IT operations.

OpsLyra is the bn-its brand for software and managed services. Five specialised products support your IT operations - each available independently, with development and support based in Germany.

THE PORTFOLIO AT A GLANCE

VMShutdownManager

Emergency shutdown
& restart

www.vmsshutdown.com

Orchestrates shutdown and restart based on dependencies and system states. Supports VMware, Hyper-V, Proxmox and other platforms; agentless, with triggering through UPS management software.

NetRetix

Network automation

netretix.com

Automates LANCOM switch configurations through the LANCOM Management Cloud. Centrally defined parameters and AddIn scripts keep VLANs and security settings consistent across multiple sites.

Omnyx360

Client management
on-premises

omnyx360.com

Configures Windows workstations by role at login: printers, drives, VPN, SSO and Defender policies. Runs on-premises; RemoteApps are available with Omnyx360 Remote.

NexaCloud

Managed private cloud

nexacloud.one

Dedicated Proxmox clusters in German data centres, operated by bn-its. Includes updates, backups with restore testing, a firewall and Vision monitoring, with predictable monthly costs.

Vision

Proxmox monitoring

prox.vision

Monitors Proxmox clusters, nodes, VMs, containers, storage and backups. Dashboards and alerts highlight issues. Uses Telegraf on the nodes, with no agents inside VMs.
