

# Heat Pumps Manufacturer

HOTJET is a manufacturer of heat pumps  
We are producing air to water, brine to water  
and water to water from 2 to 100 kW.

From the point of view of an annual production,  
HOTJET is the largest Europe producer of heat pumps.  
Our innovations in technology and services  
have made us one of the market leaders in the industry.

Our heat pumps are not only for your home, but  
you can also heat your business, production halls  
or schools. Our range of heat pumps ranges  
from 3 kW to megawatt cascades.  
We have 18 years of experience and thousands  
of satisfied customers and businesses. We source  
our components from certified manufacturers  
and ensure parts availability. We manufacture  
our own tubes and sheets for the machines.

**We've been here long enough  
and we've made too much  
to be a coincidence**

- On the market since 2006,
- more than 75 core employees,
- we already produce more than 22,000 heat pumps,
- 8000 m<sup>2</sup> of production, warehouse  
and office spaces.

#### **Save with us**

- get a special price on a heat pump,
- we minimize the costs associated with  
technician trips thanks to the possibility  
of service interventions via the Internet,
- we stock low-priced spare parts.

#### **We have a qualified technical support department**

The technical support department has a dispatch  
center for coordinating requests and processing  
them with several internal staff dedicated to providing  
services heat pump users and professionals.

**We have a network  
of business and assembly partners**  
We have a permanent network of sales and installation  
partners in the Czech Republic and Slovakia partners  
who deal with design, supply, support and servicing  
of our heat pumps with our full support.

HEAT PUMPS MANUFACTURER

Prepared  
for photovoltaics

The heat pump listens to the requirements of photovoltaics. A higher temperature and adjust its operating parameters.

Quiet  
like a breeze

Thanks to sophisticated soundproofing, active vibration -running fan large-diameter fan.

Wide range  
of accessories

- Extension of regulation,
- room sensors,
- hot water heaters,
- backup power supplies, fan coils,
- stands.

## 3 circuits HEATING AND COOLING in basic control

### WHAT ELSE IS IN THE HOTJET REGULATIONS

- Intelligent control of external boiler – gas, electric, oil,
- solid fuel boiler control, fireplace insert with heat exchanger,
- 2 consumption circuits (e.g. heat exchanger recovery),
- thermal solar with three appliances (AHU, boiler, swimming pool),
- pool heating or cooling from heat pump,
- 2× configurable differential thermostat,
- controlled flow of heating,
- legionella function
- and hot water circulation,
- external 0–10 V ON/OFF commands,
- photovoice function
- and smart grid heat pump,
- external control via API and JSON.

AIR-WATER

## PART OF THE SET

- heat pump with heating and cooling,
- SIEMENS control,
- electric heater 7,5 kW,
- energy-saving circulation pump,
- webserver for control and service via the internet,
- iOS / Android app.

## OPTIONAL

- control panel for the heat pump,
- a control panel with a temperature sensor for the space,
- temperature sensor with wired connection,
- temperature sensor with wireless connection,
- a combination of the above.

# ONE2

Heating Power: 20—40 kW

Where is nothing, nothing can not go wrong! Proven traditional on/off control without frequency converter. Heat pump in monoblock design. Especially suitable for systems with radiators and hot water heating. Safe refrigerant. Night time setting for noise reduction.

## Wx

Heating Power: 3–20 kW

Ground-to-water and water-to-water heat pump, is the smartest and most economical solution.

Higher heating factor and independence to outdoor temperatures. Longer life, no noise outside, fewer service cases.

### Part of WATER-WATER

- heat pump with heating and cooling,
- CuNi pipe evaporator
- resistant to freezing and poor quality water,
- Siemens controller,
- built-in, electronically controlled heating circuit circulation pump,
- outdoor sensor,
- webserver for control and service via the internet with cloud connection (Plug & Play),
- HomeControl IC - App for Android and iOS, Easy setup and overview of your heating and boiler room.

### Sets BRINE-WATER

- plate evaporator and condenser,
- Siemens controller,
- built-in, electronically controlled circulation pumps for heating and primary circuits,
- outdoor sensor,
- webserver for control and service via internet with cloud connection (Plug & Play),
- HomeControl IC - App for Android and iOS, Easy setup and overview of your heating and boiler room.

# Mini

Heating Power: 4 kW

Small heat pump designed for houses up to 4 kW of heat loss.

Heats, cools and heats hot water.

Installed on the wall inside the build.

## Set AIR-WATER

- integrated electric boiler 3 kW,
- energy-saving circulation pump,
- three-way valve for switching to the boiler,
- connection to Siemens cloud.

For various applications there are no limits to the imagination:

- local heat recovery,
- direct air cooling with water heating,
- dehumidification,
- pool heating.

## Mini 5Ai

Heating power	up to 4 kW
Power A7/W35 at 50 Hz 2,9 kW	2,9 kW
Electric cartridge	3 kW
Compressor power supply	1× 230 V
Compressor power supply	2× 230 V
Acoustic pressure LpA 1m	42 dB(A)
Maximum outlet temperature	55 °C
Energy label	A++
Size (width × depth × height)	654×53×802 mm
Weight	65 kg

Mini

# Hydromodule

Integrated indoor unit  
for thermal monoblock design

For 7, 10, 15 ZETXe and 20 ONE2

indoor  
installation

silent

## ADVANTAGES

- - Reduced installation time and material cost,

## INCLUDE

- separate outlets for heating and hot water,
- integrated 3-way diverter valve,
- internal electric boiler 2,5-5-7,5 kW + HDO control,
- Siemens controller,
- Circulating energy saving electronic pump,
- outdoor sensor and vent valve,
- webserver for control and service via the internet with cloud connection (Plug & Play connection),
- HomeControl IC - App for Android and iOS, Easy setup and overview of your heating and boiler room.
