bytelab

Tailor-made Electronics Development Company

15+
YEARS
IN INDUSTRY

150+
IN-HOUSE
ENGINEERS

400+
SUCCESSFUL
PROJECTS

Electronic Product Development
Working with you through the whole process of developing a new product - **from idea to market-ready product** offering you our expertise and knowledge all the way down.

Prototyping & Manufacturing
With our focus on low to mid-volume production and prototyping capabilities, we're able to **speed up the time-to-market process** and provide you with top-quality products in no time.

Engineering Services
With more than 150 in-house engineers covering
- **Software Development,**
- **Hardware Development,**
- **Mechanical engineering,**

we can support your idea at any phase.

Consulting & Digital Transformation
We provide **expert consulting** in embedded development, guiding businesses from digital transformation to **IoT development** and the support with the **manufacturing** of IoT devices.

Edge AI Solutions
We design and deploy Edge AI solutions that **run directly on devices**, enabling real-time data processing, lower latency, and reduced cloud dependency.

Mobile & Cloud Development
Thanks to our sister company, we're able to provide **complete solutions** - mobile, web and cloud, all under one roof.
