

EMBEDDED AI

# Embedded AI in Your Car

## UWB – One Sensor Platform for Access, Interaction and In-Cabin Safety

- UWB radar for in-cabin sensing - occupant presence, child presence, motion and respiration
- UWB radar for exterior sensing - kick gesture for intuitive trunk opening
- UWB ranging for smart car access - keyfob localization, inside/outside awareness
- One sensor hardware, many functions - access, safety, sensing, comfort
- Embedded AI inside - real-time sensing on the edge

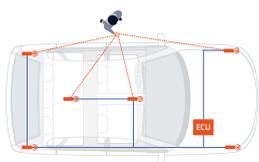

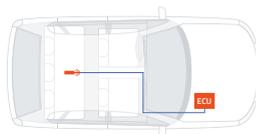

## UWB Antenna Mounting Topologies

- Performance comparison of UWB antenna mounting topologies
- Reference comparison: Classic Setup and Camera only
- Setup-by-setup overview of in-cabin, exterior and keyfob capabilities
- Potential contribution of each setup to the Euro NCAP score
- Trade-off between sensor footprint and capabilities
