

FILTER SYSTEM PARTNER

THE WHOLE WORLD
OF FILTERS

FTB – YOUR FILTER SYSTEM PARTNER

Filter technology covers a wide range of applications which require a great variety of systems and solutions. Efficient filtration, adsorption and separation are indispensable for many processes in trade and industry, laboratories and building services engineering. There are only a few suppliers who provide an extensive range of replacement filters, allowing their customers to purchase all the filters they need from one source, thus being cost-efficient.

FTB-Filtertechnik Brockmann is one of Europe's leading manufacturers and suppliers of replacement filters for a great variety of applications. We offer top-quality solutions for all areas of filtration. In order to meet all the different filtration needs of our customers, our goal is to offer the perfect filter specifically designed for all kinds of sizes, technical specifications and applications.

Focussing on our core areas of expertise makes FTB a reliable partner for your business, helping you to increase your productivity. Purchasing our filter systems enables you to buy at favourable prices, cut down on storage costs and administrative expenses, save time and money, and optimize your technical processes.

Make FTB your partner in filter systems and purchase all the filters you need from one source.

Feel free to contact us now. Our team will find the right solution for you!

hydraulics

FTB – THE WHOLE WORLD OF FILTERS

THE PERFECT SOLUTION FOR EACH AND ALL OF YOUR APPLICATIONS

Today, air quality protection and environmental compliance become more and more important.

Innovative filter systems help to improve our quality of life, increase the efficiency of tools and machinery, and protect your products and the environment.

FTB-TRADE SHOWS

You can find all current trade fair dates on our website.
www.ftb-filtertechnik.de

FTB-Filtertechnik Brockmann exhibits at important trade shows of the industry.

Participating in those trade shows gives us the opportunity to meet long-term business partners and establish new business relationships (at home and abroad).

We present our entire range of products and applications. Come and visit us at one of the trade shows named above. Our team will be more than happy to welcome you!

FTB – YOUR FILTER SYSTEM PARTNER

REPLACEMENT FILTERS FOR ALMOST EVERY APPLICATION

HVAC systems

Dust removal

Fluid filters

Your advantages with FTB:

- Reducing storage costs
- Saving money and time
- Reducing suppliers
- Optimising technical processes

Special filters

FTB – LIST OF OUR PRODUCTS

Pocket filters

- filter media: synthetic fibres
- standard and customer-specific sizes
- metal/plastic frames
- filter grades ISO 16890 / EN 779
- individual high-quality frame design
- energy saving medium

Applications:

- HVAC systems
- pre filters for:
 - spray paint industry
 - cleanroom applications

Panel filters & Z-Line filters

- filter media: synthetic/glass fibres
- standard and customer-specific sizes
- filter grades ISO 16890 / EN 779
- cardboard/metal/plastic frames

Applications:

- HVAC systems
- pre filters
- control cabinets
- suction area in compressors

Compact & panel filters

- filter media: synthetic/glass fibres
- mini-pleat filter design
- large filter area – but minimal installation depth
- suitable for high volume flow rates
- filter grades ISO 16890/EN 1822-9
- cardboard/plastic frames

Applications:

- HVAC systems
- pre filters in cleanroom applications
- gas turbines

Filters removing suspended particles/HEPA filters

- filter media: micro glass fibre paper
- standard and customer-specific sizes
- filter grades ISO 1822-9
- MDF/plastic/metal frames
- mini-pleat filter design/aluminium separators

Applications:

- cleanroom systems
- laboratories/hospitals/ pharmaceutical industry
- food industry
- microelectronics
- oil mist separation

Filter pads

- filter media: synthetic/glass fibres
- available in roll or cut pad form
- filter grades ISO 16890 / EN 779

Applications:

- primary/secondary filters for HVAC systems
- control cabinets
- motor protection systems
- intake filters used in surface engineering

Filter for spray paint systems

- filter media: synthetic/glass fibres
- pleated cardboard filters and columbus filters
- paint-stop filters, green and white

Applications:

- intake and outlet filters used in:
 - spray booths
 - spray paint systems
 - drying systems
 - ceiling filters

Ready-made filter media

- stamped parts/cut pads
- filter tubes, filter bags
- filter caps
- special filters made according to customer specifications

Applications:

- bathroom ventilation
- motor protection filters
- air recirculation systems
- extraction systems
- printing industry

Hydraulic filters

- replacement filter elements for all standard models (e. g. Mahle, Hydac, Pall, Argo)
- pressure filters and return line filters
- spin-on filters
- suction strainers
- air filters

Applications:

- filtration in oil, cooling and lubrication circuits

Fluid filters

- replacement filter elements for all standard models
- filter candles, bag filters
- filter modules (disk)
- filters for sterile filtration
- complete filter housings (strainers)

Applications:

- coarse filtration, microfiltration and filtration of process fluids

Belt filters media

- filter media: polyester, viscose, polypropylene and blended fabrics
- suitable for all standard systems
- available in various widths and lengths

Applications:

- industrial fluid filtration
- filtration of coolants and lubricants
- filtration of process fluids
- belt filter systems

Dust removal

- filter cartridges
- filter tubes
- filter bags
- filter pads
- accessories (supporting cages, venturi nozzles)

Applications:

- industrial dust separation
- silos
- sandblasting equipment
- powder coating
- welding fume extraction

Other products

- activated carbon cartridges
- FanCoil (wire frames)
- wire mesh filters (aluminium/stainless steel)
- baffle filters/flame resistant filters
