BLINK TROLL

Reshaping the capabilities of forces defending the free world

DURABLE. FLEXIBLE. PROVEN.

The BlinkTroll is a robust, autonomous moving target platform built for live-fire training across all environments. Whether mounted indoors or suspended across rugged outdoor terrain, the system simulates realistic threat scenarios with variable-speed motion via wire or static rope.

With remote control, pre-set patterns, and multi-unit integration, BlinkTroll enables complex, multi-angle drills, pushing tactical realism to new levels.

INCREASING HIT ACCURACY TO 80% ON HIGH SPEED MOVING TARGETS*

TRUSTED WORLDWIDE

Over 15,000 users across 12 NATO-countries Used by special forces, law enforcement units, and defense agencies globally. Trusted in high-stakes environments by experienced and new operators alike.

KEY TECHNICAL SPECS

- **Target Load:** Up to 10 kg (including steel and self-healing targets with flashers)
- **Speed Range:** 0.3–4 m/s (patrol to sprint)
- **Battery Life:** Up to 10 hours continuous use**.
- **Control Range:** Up to 300 m (up to 1000 m with Range Extender)
- **Mounting:** Suspended via wire or static rope
- **Terrain:** Operates in all weather and terrain types
- **System Weight:** 16.6 kg total for the Base Kit, 39 kg for the Range & Target Kit
- **Connectivity:** Establishes own secure network, no external connection needed

MISSION-READY VERSATILITY

Fully customizable to your operational needs:

- **Urban Combat Scenarios**
- **Sniper & Marksman Training**
- **NATO standard shooting drills**
- **Tactical Team Coordination**
- **Asymmetric Threat Simulation**
- **Counter-UAS (C-UAS) shotgun training**

*Private research from a live-fire exercise in europe, measuring hit accuracy of trained and untrained soldiers after using the Moving Target System.
**Depending on training scenario and attached target weight.
