## ABOUT US

Teknofarma is a **leading veterinary pharmaceutical company in the field of pet health and well-being.**

For over sixty years, it has been developing, manufacturing and marketing:

- veterinary medicinal products
- complementary feed for companion animals
- products for animal hygiene and well-being.

The company also offers the service of Contract Manufacturing.

### Veterinary medicinal products

Veterinary medicinal products are the **company's core business.**

Teknofarma is the **marketing authorization holder** of a high number of veterinary medicinal products belonging to several pharmacological classes: anthelmintics, ectoparasiticides for external use, diuretics/cardiological drugs, multivitamins, dermatological medications, urinary acidifiers, otologicals.

**All products are designed, developed and formulated in-house.** All manufacturing operations are carried out according to international quality standards - in compliance with cGMP regulations - in dedicated departments equipped with state-of-the-art equipment and technology.

## Complementary feed

Teknofarma holds the authorization to produce and package complementary feed and premixtures for companion animals.

All the products in our range are the property of Teknofarma and include:

- tablets in blister packs or pill bottles
- powders
- liquids (solutions and suspensions) in bottles.

**All products are designed, developed and formulated in-house by Teknofarma.**

Formulations are manufactured and packaged in a new dedicated unit created in 2018 to meet the growing demands of a rapidly expanding market. Equipped with pharmaceutical-grade finishes, the unit features state-of-the-art equipments.

## Third-party distribution

For years, Teknofarma has also been **distributing third-party** medicinal and animal well-being products **throughout Italy**. Decades of experience of the company and the activity of Teknofarma's Medical Representatives ensure a **widespread distribution** of the products.

## Laboratories

The **Quality Control** (chemical and microbiological analysis) and **Research & Development** laboratories are equipped with modern instrumentation and advanced technologies (**HPLC-DAD, NIR, LC-MS, GD-FID, ICP-MS, UV, IR, climatic chambers** for VICH stability studies).

# QUALITY

*Quality means doing it right when no one is looking*

**Henry Ford**

The development and manufacturing of Teknofarma products follow the **quality standards** of the pharmaceutical industry and are compliant with the regulations that apply to each specific type of product.

The Company operates in accordance with international quality criteria defined by the following standards:

- **GMP** (Good Manufacturing Practice), a set of principles and rules that regulate the production of medicinal products and establish the technical and methodological criteria required to ensure the quality of the manufactured product
- **ISO 9001:2015**, a globally recognized standard for quality management, regarding the production and packaging of veterinary medicinal products and third-party distribution activities
- **HACCP** and **GMP+**, for complementary feed. In 2021 Teknofarma obtained the GMP+ Feed Safety Assurance certification (Production of Compound Feeds (pet food)), an internationally recognized standard specific to pet food.

This standard, designed specifically for the manufacturing and marketing of pet food, **aims to ensure the safety and quality of pet food products** (complete and complementary feeds) through shared rules to be applied to the entire production process, from the selection of raw materials to finished products.

## OUR HISTORY

Teknofarma is created thanks to the brilliant intuition of its founder, Vittorina Colombatti, who applies the experience gained in human pharmaceuticals to animal care

1963

**Ascarilen**, the first levamisole-based product for dogs and cats; levamisole is a levorotatory isomer of the much less active tetramisole, which was then available on the market

1975

**Diuren**, the first veterinary diuretic and still the only one with a full range of formulations and concentrations

1987

**Glazar Derm**, a complementary feed containing the main elements involved in and necessary for the skin and coat metabolism; it is the first containing Omega 6 and Omega 3 essential fatty acids

1991

Launch of **Iken Up**, the first commercially available product for a targeted, broad and calculated supplementation to meet the increased need of nutrients and micronutrients resulting from various kinds of stress

2000

Teknofarma obtains the GMP+ Feed Safety Assurance certification (Production of Compound Feeds (pet food))

2021

**Anchilen**, Italy's first injectable anthelmintic for dogs, is developed to treat the house puppy, the beloved Asch, who does not respond to traditional treatments

1967

**Len**, the first oral polyvalent anthelmintic for dogs and cats

1979

Teknofarma develops iconic products, starting from **Pletonvit**: a complete polymineral and polyvitamin supplement for dogs, useful to cover increased needs in particular situations such as growth, pregnancy, lactation, convalescence, and senility

1990

**Deroxen**, the first chlorhexidine-based veterinary medicinal product registered in Italy

1998

**Stimulfos Pet Line**, complementary feed with beta-glucans, phosphatidic acid and B vitamins to support the immune system, counteract catabolism and muscle mass loss, and maintain full efficiency of all cellular processes

2017

Teknofarma obtains the ISO 9001:2015 certification regarding the production and packaging of veterinary medicinal products and third-party distribution activities

2024

# COMPLEMENTARY FEED

## IKEN UP PLUS

An extra boost for our pets

Iken Up Plus is a complementary feed for dogs and cats with **carnitine, amino acids, B vitamins, micronutrients** and a complete pool of **antioxidants**. It is indicated to meet increased specific nutritional requirements in situations of both physiological and pathological stress.

**The complementary feed chosen by the FISC Italian National Agility Dog Team, WORLD CHAMPION 2022**

**OFFICIAL SPONSOR**

The athletic training of sporting dogs is essential to ensure their mental and physical well-being before their competitions. A healthy, well-trained dog will certainly be a better performing dog, and one with a much better quality of life. This is why the athletes of the FISC National Agility Dog Team chose Iken Up Plus for the nutritional supplementation of their dogs before, during, and after the World Agility Championship held in the Netherlands in August 2022, where they became World Champions with an impressive 32 medals.

## STIMULFOS PET LINE

A boost to the immune system  
and metabolism

Stimulfos Pet Line is a complementary feed for dogs and cats containing beta-glucans, phosphatidic acid and B vitamins. It **supports the immune system during debilitating diseases and chemotherapy treatments**, during vaccination prophylaxis, and in all situations of increased catabolism.

## STIEN PET LINE

Struvite stones?  
No problem!

Stien Pet Line is a complementary feed which **supplements the diet of dogs and cats suffering from struvite and helps reducing the urinary pH**. It contains a combination of Methionine and Ammonium chloride that promotes the rapid acidification of the urine pH and keeps it stable over time.

## HERP

Specific for cats with viral respiratory infections

Herp is a complementary feed for cats available as an oral solution containing Lactoferrin and Lysine. It is **indicated to supplement the diet of cats who are subject to pathogenic pressure** (e.g., in Herpes Virus and Calici Virus carriers) as soon as the symptoms appear, and in case of relapse.

## GLAZAR DERM

The best friend of skin and hair

Glazar Derm is a complementary feed for dogs and cats indicated for the **well-being of skin and coat**. It contains vitamins, Zinc, sulfur amino acids, and all essential fatty acids in a biologically active and ready-to-use form.

## LINSEN

Nutritional support in case of chronic inflammation

Linsen is a complementary feed for dogs and cats high in Omega-3 fatty acids, indicated as **nutritional support in case of chronic inflammatory conditions** (such as atopic dermatitis, osteoarthritis, asthma, allergies, kidney failure).

## LIPOVET

Supports growth and reproductive function

Lipovet is a complementary feed for dogs and cats designed to meet the **increased demand for liposoluble vitamins** during particular periods of their lives. In particular, it supports the growth of kitties and puppies and helps to counter fertility disorders in adult dogs and cats. It contains Vitamin A, Vitamin D, Vitamin E and lecithins.

## ALS

A supplement of minerals for the homemade diet of dogs

ALS is a complementary dog feed indicated to supplement and balance the requirements of minerals in animals who are fed a homemade diet. It provides Calcium, Phosphorus and trace elements (Potassium, Iron, Zinc, Manganese, Copper, Iodine).

## UPSI CROK

For the optimal development of bones and teeth

Upsi Crok is a mineral-based complementary feed for dogs and cats; it is particularly suitable for the optimal development of bones and teeth and to supplement the food intake of animals fed a homemade diet.

It contains Calcium, Phosphorus, Vitamin A, Vitamin C and Vitamin D.

# PRODUCTS FOR ANIMAL HYGIENE AND WELL-BEING

## DEROXEN PET LINE

For the hygiene and well-being of skin, hair and ears

**Deroxén Pet Line Shampoo:** for the preventive hygiene of the skin and hair of dogs and cats. It cleanses the skin and hair, acting directly on the causes of bad odors, and helps reduce itching.

**Deroxén Pet Line Foam:** Spray skin foam with sanitizing and soothing action. It helps relieve itching and reduce bad odors. Ideal for puppies.

**Deroxén Pet Line Oto:** Ear solution for the preventive hygiene of the outer ear in dogs and cats. It acts directly on the causes of bad odor and itching, helping the removal of dirt, sweat and cellular debris.

## CERULEN

For the hygiene and cleaning of the ears

Cerulen is an **auricular solution to clean the ears of dogs and cats.**

It has a triple action: it softens earwax thanks to the presence of Perhydrosqualene and Myristate of isopropyl; it sanitizes the ears and removes bad odors thanks to Tea Tree Oil; it has soothing and repairing properties thanks to Bisabolol and Calendula and Helichrysum natural extracts.

A dog has no use for fancy cars,  
big homes, or designer clothes.

A water logged stick will do just fine.

A dog doesn't care if you're rich or poor,  
clever or dull, smart or dumb.

Give him your heart and he'll give you his.

How many people can you say that about?

How many people can make you feel rare  
and pure and special?

How many people can make you feel  
extraordinary?
