

Established in 1999, Lijialong is an industrial company integrating raw materials, technology development, manufacture, sales, consulting and service, also the world's largest producing basement of door and window sealing weatherstrips, and as well the production basement of cleaning brushes for international famous brand vacuum cleaners.

The Construction Weather Strip Division is Lijialong's "founding product," which has enabled the company to accumulate core weaving technologies and production processes, serving domestic and international clients in the construction and furniture industries, the division now operates two major production bases (Haining, China and Suez, Egypt). With over 20,000 m² of production basement, has 230 weaving machines, 14 automated back-end production lines, and 21 American-style extrusion lines, achieving a total daily output of 2.3 million meters. The company exports to 72 countries, with exports accounting for 70% of total sales.

Lijialong has both weaving and extrusion production processes to meet customer demands, offering 7 core product lines: High-resilient High-Density Pile Series, Energy-Saving Fin Series, Household Self-Adhesive Series, Screen Window Seal

Series, American-Style Multi-Silent Fin Series, Dust Plug and Wooden Window Composite Extrusion Series. Products certified by AAMA (USA), RoHS and REACH (Europe), and as a national standard drafting unit for China Door and Window Association. We are also a Gold Member of AAMA (USA) with over 10 years of membership.

Over the past 26 years, Lijialong has established a significant industry presence in construction and interior home furnishings. We hold a strong advantage in core metrics such as sealing performance, abrasion resistance, and weather resistance, serving as a long-term supplier for numerous large-scale construction.

To meet the construction industry's growing demands, Lijialong has developed a substantial portfolio of new products to enhance diversified service offerings.
