JNEX – Designing for the Community

Two decades of experience, shaping a new future. For more than 20 years, we've been shaping the places where communities are born. Under the JNEX brand, we are taking the professional experience of Játéknap Kft. to a new level: whether it's play, sports, or creating an inclusive environment, every aspect of our work reflects our commitment to sustainable, high-quality, and safe community spaces.

We Create Public Spaces

A modern and truly inclusive playground is not just a collection of equipment, but a safe environment for childhood experiences, motor skill development, and social interactions.

Why Do We Think Differently About Playgrounds?

At **JNEX PLAY**, the design process starts with human needs, not a catalog. Our philosophy is based on inclusivity: we create an environment where every child can find challenges and opportunities for safe play, and thus support community inclusion.

**Intelligent spatial connections,
livable public spaces**

The city as a unified system

In the **JNEX CITY** division, we treat urban spaces as complex ecosystems. Our solutions—from functional bus stops to community park furnishings—are not isolated components, but rather parts of a unified visual and engineering language. Our goal is to strike a balance between mobility and recreation in the metropolitan environment, supported by durable, vandal-proof, and people-centered tools that support the development goals of municipalities and investors.

Where Performance Meets the Environment

We develop professional obstacle courses and functional sports parks where everyone can take on a challenge.

Functionality, Safety, and Competitive Spirit

At **JNEX SPORT** we combine more than two decades of engineering experience with the demands of modern fitness culture. Our approach is based on the principle that the sports infrastructure we develop should not merely be a training venue, but an innovative meeting point for community fitness and competitive sports. The use of the highest-quality materials and precise ergonomics ensure that our equipment creates a safe and inspiring environment for both professional athletes and amateur sports enthusiasts.

More Than Just Standard

Our custom-designed furniture and our indoor and outdoor urban installations in public spaces not only have a distinctive appearance but are also built on pure functionality.

Our forms are clean, and our solutions follow progressive trends while also serving the comfort and inspiration of the public.

Where engineering precision meets the human scale
Functional installations and furniture defined by
a unique design language.

Social Responsibility and Creating Opportunities

JNEX CARE is JNEX's social responsibility division, which supports disadvantaged children and adults with disabilities, as well as their families, through the Játéknep Foundation.

Two decades in the service of community inclusion

The professional beginnings of our CARE division are based on the Játéknep Foundation's two decades of work dedicated to the integration of children with disabilities. Our commitment to community spaces is not merely an engineering issue: we integrate the firsthand experience gained through our foundation's work into the development of modern urban environments.
