Since 1833,
Tournaire
protects

In the heart of your business.

Primary packaging is the ultimate interface between your clients and products. It does not only guarantee their integrity during the whole shelf life even in severe transport conditions, but it also allows the final user to be sure to apply easily the right product. Seamless aluminium bottles are ideal primary packaging for sensitive products.

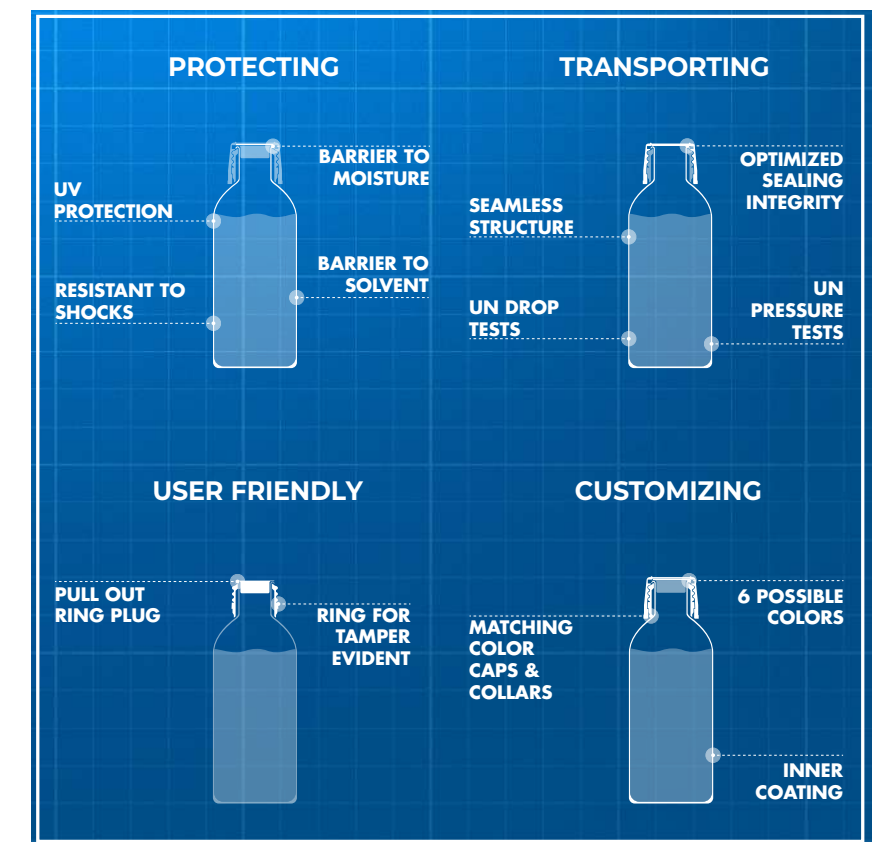

Tournaire has well understood the complexity of the recent formulations in the adhesive sector, which involves better protection to moisture, oxygen, and more hermetic and chemically resistant packaging material. Multi components adhesives with primers and activators have also diversified the requirements in sizes and functionalities. Simultaneously, more demanding regulations have pushed forward safety in the transports and more accurate traceability.

For more than 50 years, Tournaire has packed the most sensitive primers and activators and offers versatile solutions for this very specific market.

Outstanding features & performances

- Pure aluminium (99% minimum): unbreakable & rust-proof
- Seamless structure: no permeation, perfect seal integrity
- Tamper evident
- UN certified stand alone packs: ready to ship hazardous goods
- Large range from 20 ml to 32 L
- Multiple traceability
- Optional: inner coating, LDPE plug, PTFE wad, colored caps & collars

AP25 / AP28

From 20 cc to 315 cc.

25 and 28 mm caps pilferproof standard.

SYSTEM PLUS 32®

From 50 cc to 1.100 L

Robust 32 mm tamper evident caps.

SYSTEM PLUS 45®

From 625 cc to 6.250 L

Robust 45 mm tamper evident caps.

SYSTEM PLUS 62®

From 1.25 L to 32 L

Robust 62 mm tamper evident caps.

Pure Aluminium :

Tournaire original, the choice for supporting sustainability.

Tournaire has chosen pure Aluminium because it is light-proof, neutral or rust free. It is also the most widespread metal on earth and it is infinitely and easily recyclable: recycling one ton of aluminium saves five tons of bauxite. Nearly 75 percent of all aluminium ever produced is still in use today making aluminium one of the most sustainable packaging materials.
