# SAN's Breachers' Training Door

**Video -** https://youtu.be/sJcqV5vqb_I

**Catalog #** P710-BTD

**Dimensions W/H/D** – 126.4cm (49.6") W x 203.7cm (80.19") H x 34.8cm (13.6") D
**Weight:** 260kg (573.3 lbs.)

SAN's Standalone Reusable Training Door has a patented unique design, mimicking the feedback from a real door once forcible methods of entry are applied on it. Operators can train on different elements that exist in the urban environment in various compositions which include :

- Pull (Outward, Negative) Doors
- Push (Inward, Positive) Doors
- Zero Gap Doors

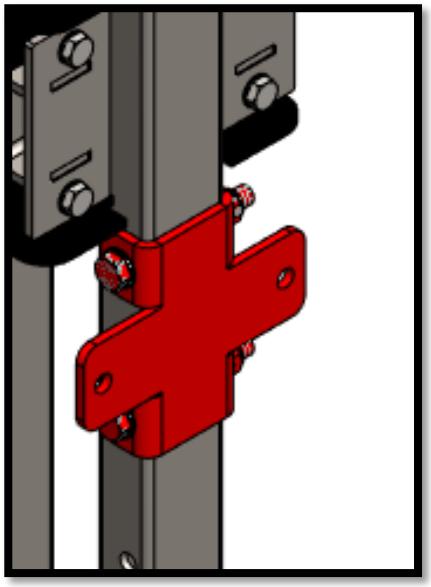

**Approved Methods of Entry:**

- Mechanical (Ram, Pry, Sledge, Cut - locks, chains, rebar)
- Hydraulics (All types)
- Ballistic (Shotgun - with blanks rounds only)
- Explosives (push charge style only) – up to 13gr (200 grain)

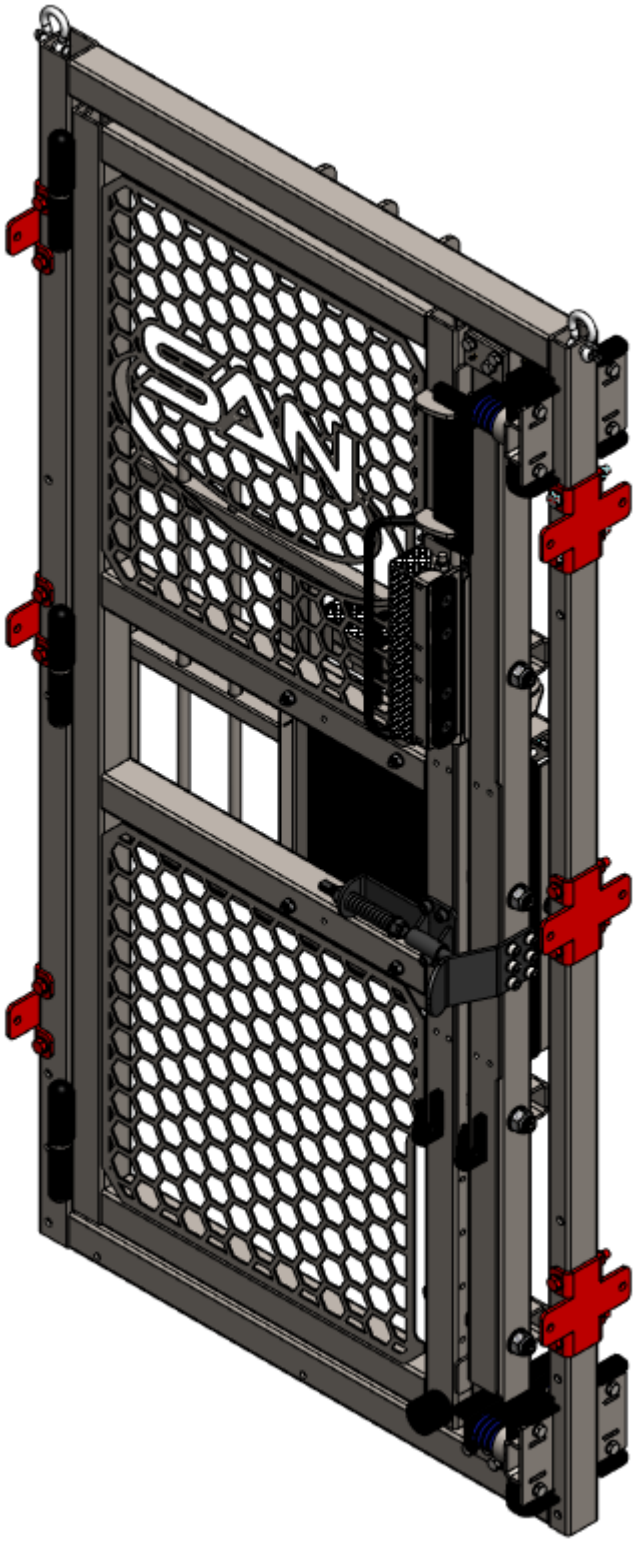

**Additional Specification:**

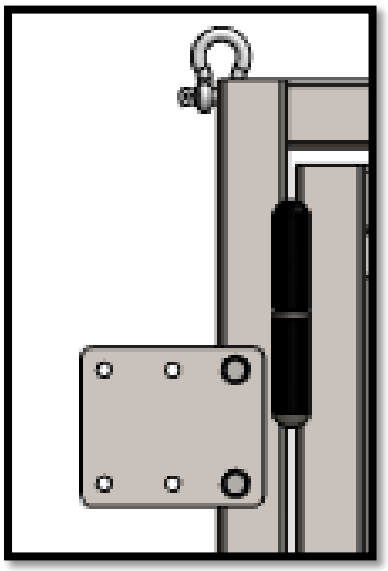

1. Warranty: 3 Years (In accordance with the user manual guidelines).
2. Locking Points: 5 Steel Rods (6mm / 1/4" ∅) and four 2cm x 2cm Wooden Shims
3. Locking Mechanisms: Reusable; Interchangeable; Quickly & Easily Replaced
4. Can be used as standalone or assembled as part of a structure/standard shipping container
5. Pending Patents: 3
    a. Rotating beam – supported by springs
    b. Adaptable locking mechanism
    c. Collapsible and flexible edge for pull doors
6. Spring tension – can be adjusted and escalated to various breaching levels during training
7. Zero Gap Door mechanism – spring-assisted, gap can be adjusted, and wood receiver can be replaced
8. Shotgun Gate – Simulated doorknobs and deadbolts, with the ability to place plywood backing plates and wood dowel inserts to simulate a locking mechanism
9. Mechanical Breaching – Designated AR500 reusable metal plate with additional rubber plate for ramming.
10. Reusable Lock Mechanism

## Optional Addons:

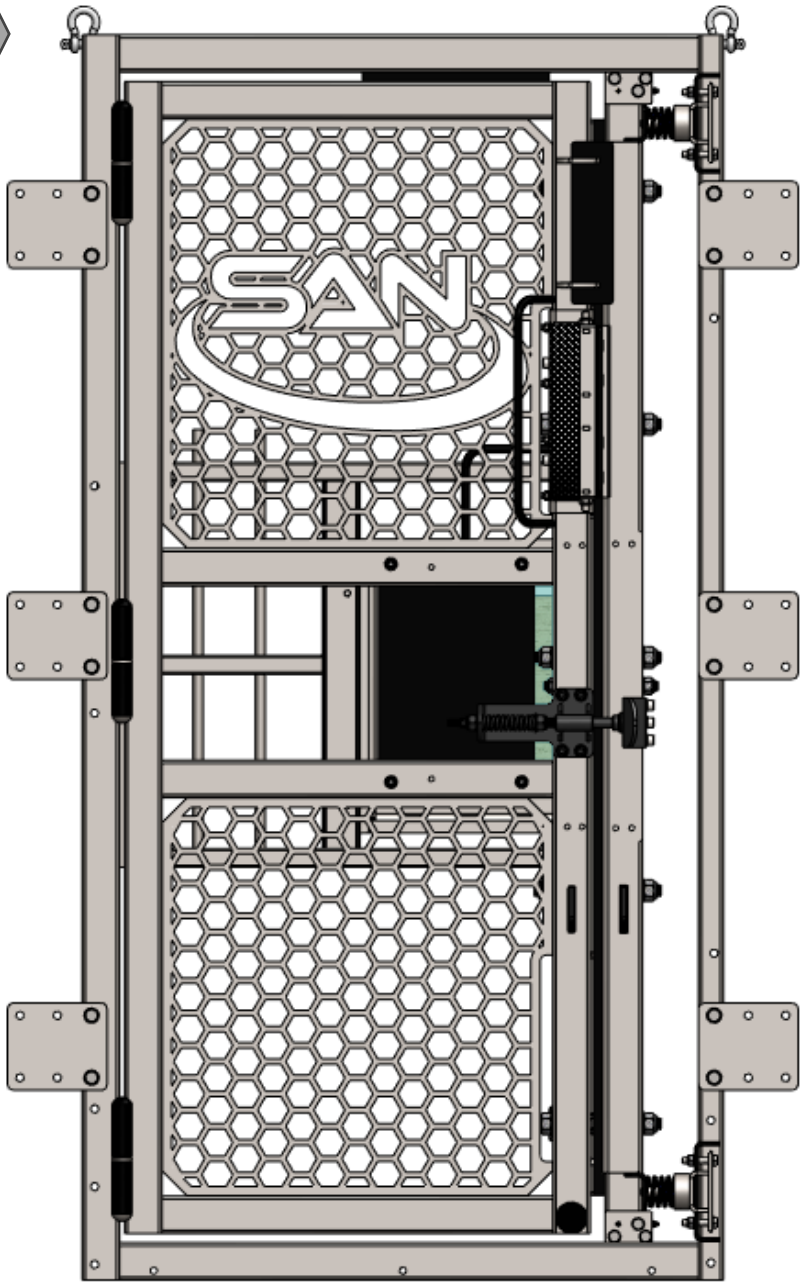

Wall mounting

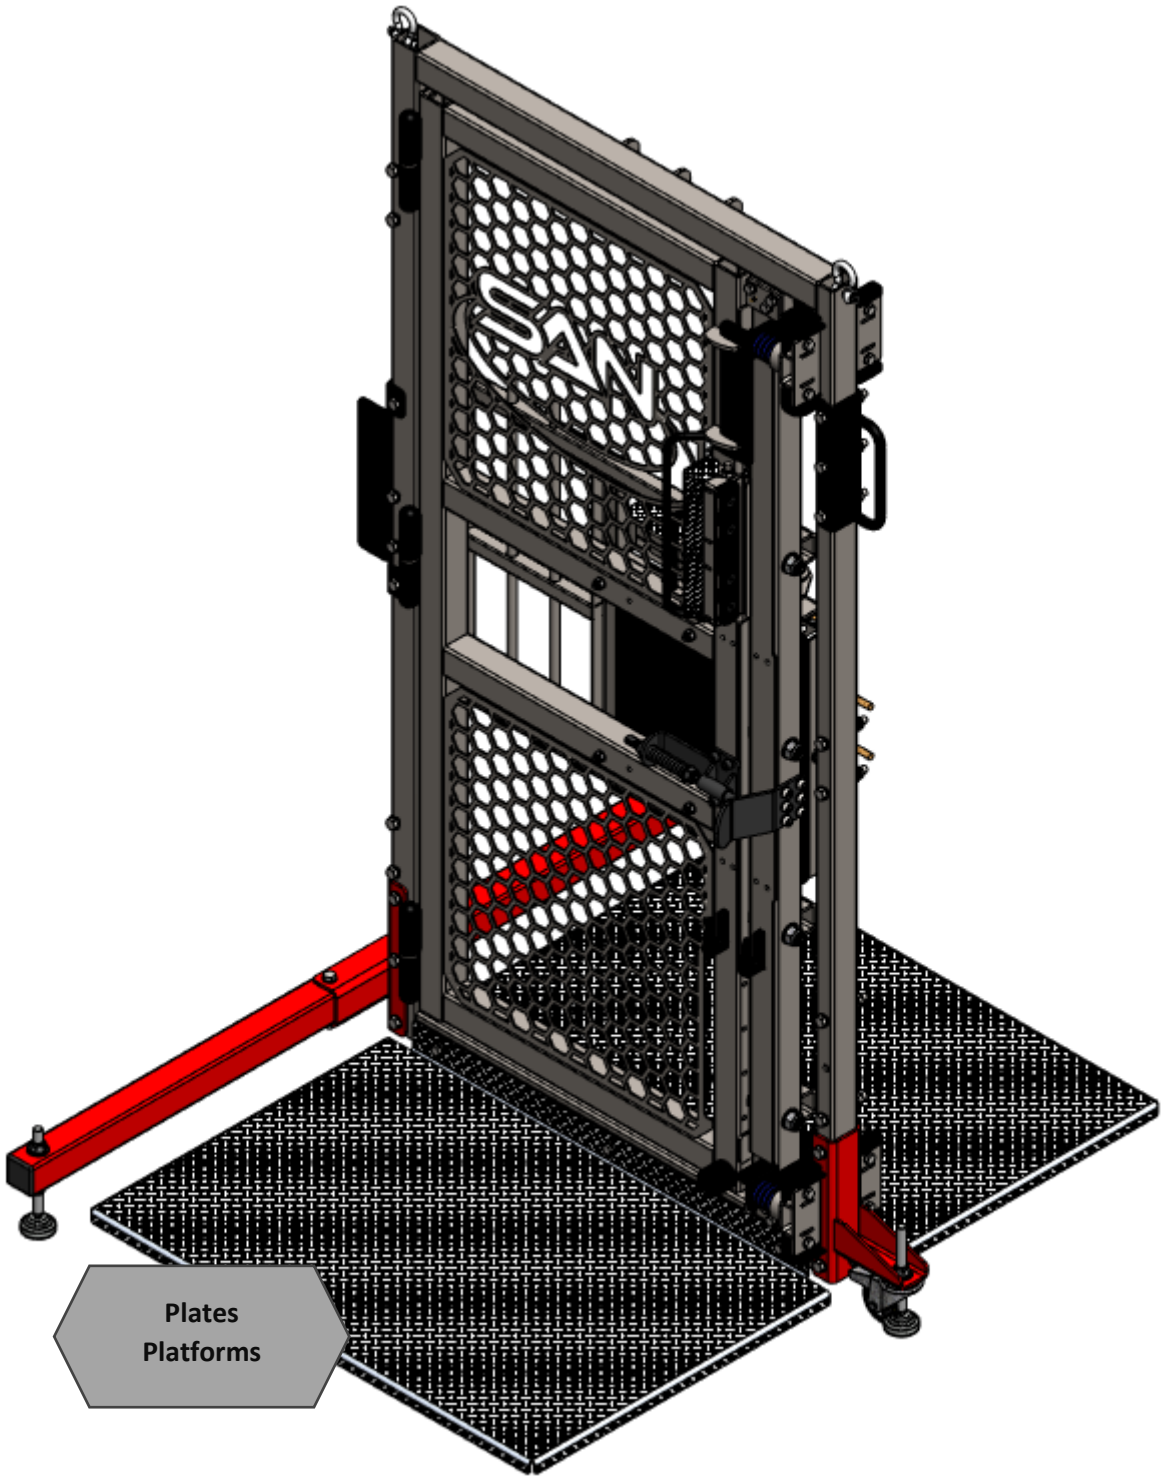

Container mounting
