

Did you know your dog might
suffer from separation anxiety?

DON'T WORRY, DOG HAPPY!

This is not a TV; it's the world's first Pet Media Box!

HAVE YOU EVER REALIZED?

01

Excessive howling
& barking

02

Trembling
or salivating

03

House
soiling

04

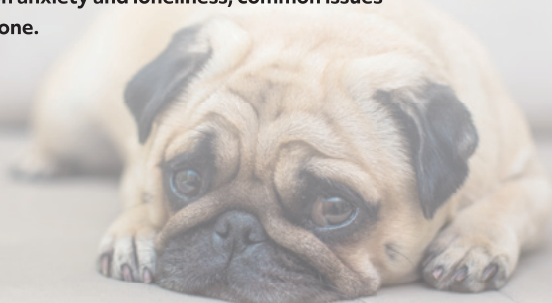

Digging
& Scratching

05

Destructive
chewing

Did you know your dog might show these signs when distressed, especially when you're away? These behaviors often result from separation anxiety and loneliness, common issues for dogs left alone.

WHAT IS DOGSPLAY KEY FEATURES?

Dog Filter

Why do our dogs need Dog Filter?

Dogs see in yellow and blue hues, have red-green color blindness, and detect higher frame rates than humans, making regular screens look choppy. They are also nearsighted, seeing distant objects as blurry.

How does Dog Filter works?

Dog Filter enhances blue and yellow tones as well as sharpens images, optimizes frame rates for a smoother viewing experience.

	Human	Dog
Visual Acuity (Sharpness)	1.0 ~ 1.2	0.27
Color Spectrum	Rainbow	Yellow, blue and grey
Visual Motion (FPS)	16 ~ 20	70 ~ 80
Vision	Conditional	Short-sighted

Dog Speaker

Why Dogsplay uses a Wide-range speaker system?

Dogs have broader hearing range. With Dogsplay, it allows your dog to experience sound in full spectrum that a normal speaker can't provide.

40kHz — Dogsplay Speaker

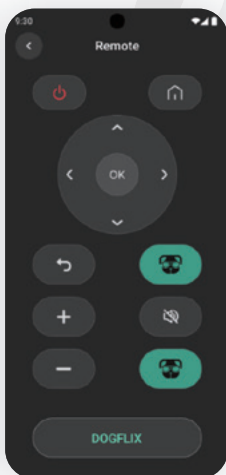

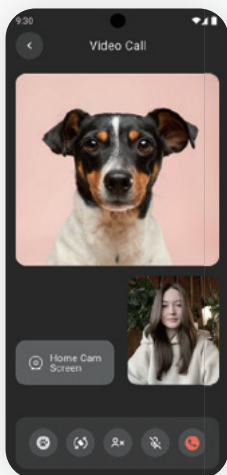

20kHz — General Speaker

20Hz

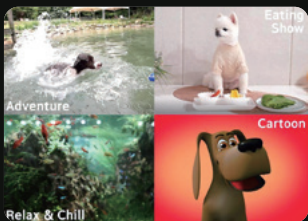

Dog Call & App

Wouldn't you love to see your dog when you're away?

Dogsplay also enable you to video call your dog, monitor them, and even control remotely, perfect for when you're away.
